A Specimen Boysenberry

# Boysenberry

## THE NEW MONEY-MAKER

50 Berries  
known to fill a  
quart box.

See cover for  
picture in  
natural colors.

Known to bear nearly 6 tons per acre. Berries get to be 1 1/2 to 2 inches long, 1-inch thick. Sweet, few seeds, and hardy.

Boysenberry is the sensational new berry. It was introduced in 1932 in California. It is a cross between the California Loganberry, Raspberry, and Blackberry. Think of a berry that has a little of each of these fruits all in one giant, nearly seedless, beautiful wine-colored berry, with a flavor that you will never forget. They are sweet and juicy, yet firm enough to stand handling and shipping to market. The vines are hardy, and can be grown in the East and North, as well as in California and other southern states.

### Enormous Size

From a recent publication by the United States Dept. of Agriculture is the following statement: "Under favorable conditions, 50 of the largest berries will fill a quart box." Of course these 50 berries would have to be selected, and would not be the average. We would say that 75 to 85 berries would be average.

### Profitable

Whether you are growing berries for market or just a few in your garden, it will pay you well to get started right now. Twenty-five plants will be plenty for home use. Six hundred plants will set an acre, set 8 ft. by 8 ft.

### Growing Suggestions

The BOYSENBERRY is a vine. It should be set 8 ft. apart each way. This is because it is a rank grower. In this way you can cultivate them both ways and save hoeing. Set the plants in April and May, and let them vine on the ground the first year. In the fall following setting, we would suggest a little manure applied around each plant. In the spring, they should be tied up to wires, just like grape vines. One-half pound of Sulphate of Ammonia applied to each plant early in the spring will cause them to produce these enormous crops. Good cultivation right through picking season will hold moisture. Start right by getting the genuine Boysenberry plants from us. Our prices are right. 600 plants will set an acre.

GEORGE STROMER

## Our Guarantee

We guarantee every plant sold by us to be first class in every respect, free from any injurious diseases or insects, and true-to-name, and hold ourselves ready upon proper proof, to refund or replace any that prove otherwise. It is mutually agreed between ourselves and the customers that we shall not be liable for a greater sum than the amount paid us for the plants. Not responsible for crop damaged by weather, fire or floods. We reserve the right to return money in case of shortage.

# Garden Success

It is a pleasure to send you this catalog called GARDEN SUCCESS, and I hope you will like it. I will again offer you the highest quality Hardy Northern Grown stock at the lowest possible price. The South Michigan Nursery, I believe, will have a larger stock of the New Wayzata everbearing strawberry to offer this year, than any other one nursery in the country. We always have been headquarters for the famous Mastodon everbearing strawberry, and originator of the Alfred Blackberry.

Your order, large or small, will be appreciated. Most nurseries will not accept an order for less than one dollar. I will take your order from 10c up, and it will get just as much attention as one for \$10.00. Your order will receive my personal attention, and you will get a square deal, or I want to know about it. Your order will be acknowledged promptly by first-class mail, in the form of a duplicate copy.

Our terms are cash with order. Later in the season, if you are in a hurry, you may phone or wire your order and it will be shipped the same day C.O.D. Phone New Buffalo No. 27. Western Union and Postal Telegraph service are both available.

If you have the money on hand when this catalog arrives, you can save some money by ordering at once. I am offering you 10% discount for all orders received in January, 5% for all orders received in February. Don't overlook the nice premiums I am offering for \$5.00, \$10.00, \$25.00 and \$50.00 orders. This stock will be of the highest grade—not a lot of junk we want to get rid of. I want to thank all my old customers and friends who have ordered before. And to you who have never ordered from the South Michigan Nursery, will say that I believe that it will pay you to direct a trial order this way this year. Remember, satisfaction guaranteed. All plants are twice State Inspected, and are healthy and true-to-name.

Now for a few words about some of the items that are listed. The Boysenberry is a real home use berry and a commercial money maker. It is past the experimental stage. The Blueberries are being grown more and more by the home gardener. With the SODUS ACID HUMUS that we handle this year, anybody can grow them in their garden. The Wayzata is doing better every year. Mastodon and Gem are still the leaders. We are offering several new varieties of raspberries, and 32 varieties of new and old apples. We have added many new varieties of shrubs, evergreens, and ornamentals, and a dozen of the finest everblooming roses that you can grow. Only the real worth while varieties of peaches, pears, plums, cherries and grapes are offered. Your order will be greatly appreciated and will be acknowledged the same day received. Your acknowledgment will be a copy of your order sent to you by first class mail. This gives you a chance to check it and report a mistake if it should happen.

## PICKING STRAWBERRIES BY THE BARREL

### PICKING STRAWBERRIES "BY THE BARREL"

This Picture and News Item Appeared in Several Hundred Newspapers in the Country. Mr. Sindelar got the idea from "Garden Success" and bought the plants from us.

**Ideal Barrel Setup, No. 7**  
45 Wayzata, 1 yr.  
6 Wayzata Clumps  
For **\$2.20**  
Only

Set clumps on top.

NORTH JUDSON, IND.—The photo at left is of Joseph Sindelar of North Judson, Indiana, who is picking strawberries "by the barrel." Mr. Sindelar drilled holes in the side of a barrel, filled it with soil, and whenever he coves a dish of berries he rolls the barrel in the shade of the old apple tree, pulls up a comfortable rocker and avoids the back-breaking work of the berry picker in the sun.

## A BARREL OF STRAWBERRIES and a Barrel of Fun

Grow any everbearing strawberry in a barrel. 50 plants can be planted in a common sugar barrel, or even on old potato barrel. Bore 2-inch holes in the side of the barrel, and fill barrel with some good soil. Then set the plants in these holes, and 10 plants can be set on top. Keep well watered. Be sure to bore a few small holes in the bottom for drainage. Barrel can be kept in the back yard, or even on the back porch. This saves space, and you can have berries for breakfast twice a week. No weeds, no cultivation necessary. Keep runners pinched off. Wayzata would be the ideal variety to grow by this method. They make very few runners, but great quantities of berries. Be the first one in your neighborhood to try this stunt.

## EASY TO GROW EASY TO PICK

Doing it in a big way

# Wayzata Everbearer

**THE HONEY SWEET BERRY**

**RED TO THE HEART**

**SMALL HULL — NO GREEN TIPS**

**DISEASE FREE**

**THREE CROPS IN 18 MONTHS**

**SWEET AS SUGAR**

A few years ago, before automobiles were all good, I often said I wished I could have a car with all the good points of all the makes in one car—then I would have a real automobile. WAYZATA is like the REAL automobile. It has all the good features of all Strawberry varieties. First of all, it is the sweetest of all Strawberries. It is red clear to the heart, never ripens with a green tip. One of the most noticeable features of Wayzata is its very small hull, and this makes it easy to prepare for table use. The berry is well shaped, firm, and ships well.

Wayzata challenges the world in size and productiveness. Will bear three crops in eighteen months. The plants will start to bear fruit in 60 to 90 days after setting. Wayzata adapts itself to the widest range of soils of any variety. It does excellently in a

heavy clay soil, has given fine results in muck bottom lands, and, of course, never fails on sandy and sandy loam soils. Will even give satisfactory results in the lightest of yellow sand, with a little fertilizer added to the soil before setting. It is hardy and tough. Has stood 40 degrees below zero without injury. It seems that diseases and insects just do not like the Wayzata plants. Their dark green, leather-like leaves are very rarely attacked by any of the common Strawberry diseases or enemies.

In drought-resisting, Wayzata does as well as Senator Dunlap. Wayzata makes very few runner plants, but makes stools of suckers that will also bear fruit. It is too busy making fruit buds and new stools. I have counted over 20 fruit stems on a single plant, and still more were coming out. The plant will be just loaded with ripe berries, green berries, blossoms and buds. This is continuous from July to winter. The very reason that Wayzata plants are listed higher than other varieties of Strawberries is that even with our scientific method of growing Wayzata **for plants only**, we have difficulty growing enough plants to supply the demand.

## STROMER OFFERS SOMETHING NEW IN STRAWBERRY PLANTS

Notice the picture of the two strawberry plants. This is something new. This year we are listing Wayzata Strawberry clumps. The smaller plant to the left is a one-year-old runner plant, and the large one is a Wayzata clump. This clump is over ten times as large as the one-year-old plant. In April, 1936, this plant was only as large as the one-year plant; in six months it grew to the size that it is. The rule between them is an 18-inch rule, and this will give you some idea as to the size. This clump plant could be divided into 6 or 8 plants, and every one of them would do just as well as the one-year-old plant at the left, but by carefully planting this clump in your garden just as it is, by the middle of the summer you could have a single Wayzata plant as large as a bushel basket, and loaded with great quantities of rich red berries.

Twenty-five clumps should furnish enough berries for an average family. This very clump plant, before it was dug up to make this photograph, was fourteen inches in diameter. These Wayzata plants were grown on rich, new ground—note the particle of rotted wood fibers still attached to the roots. These CLUMP plants are mother plants that failed to send out runner plants and instead sent out stool plants all around the mother plant. These clump plants will give marvelous results with ordinary good care when set in your garden. They are much easier to start than the runner plants, because you have more to start with. They should be planted like you would a tree. The roots are long and plenty of them. Spread the roots out all over the shallow hole. DO NOT SET TOO DEEP and tramp the soil firmly around the plant. Keep all the buds and blossoms off the plants for the first five or six weeks. This will give the plants a good start, and then let them blossom all they want. You will have berries within three weeks after they start to bloom.

# BLUEBERRIES

**DELICIOUS  
PROFITABLE  
VERY ORNAMENTAL**

Our Blueberries are far superior to the wild Blueberry or Huckleberry. These Blueberries grow in large clusters of the most beautiful blue color, plump, tender and practically seedless. The flavor of these cultivated Blueberries is simply delicious. Bushes will grow to the height of 8 feet. The plant itself is very ornamental.

During the summer the foliage is deep satiny green, and against this background hang clusters of berries royal in their magnificence. During autumn the leaves turn bronze, and during the winter months the twigs are red. Buds are pink and open to white, bell-shaped flowers. **Two plants** should be set out to insure cross pollination, so we would not advise to set just one plant. We are offering 2-year plants that will start to bear the second year. Blueberries like these sell for 55c and 70c per quart on retail markets.

Blueberries prefer an acid soil containing an abundance of peat or other partially rotted vegetable matter. They also need a moderate supply of moisture, but good drainage. In other words, water must not stand where they are planted. If your soil is not already acid, this condition can be created by mixing in the soil, old sawdust, pine needles, or soil from the bottom of old wood piles. But the very best thing to use is our SODUS ACID HUMUS. This is a sour fertilizer you should use for Blueberries, Evergreens, Azaleas, Rhododendrons, or any shrub that requires an acid soil.

**DIRECTIONS** for the use of SODUS ACID HUMUS for planting Blueberries or other plants that need an acid condition: Dig a hole large enough for the roots to have a full spread on the bottom, so the ends of the roots do not turn up. Have the hole at least six inches deeper than needed. Then pour one gallon of SODUS ACID HUMUS in the bottom with an equal amount of the top dirt, mix this thoroughly before putting the plant in place. Then use another gallon as you fill the hole up. If the soil is poor, use more of the Sodus Acid Humus. You will be pleased with the results.

Price: 2-bushel bag (about 100 lbs) ., \$1.00, no discount. Carload prices on request.

We have a limited amount of Rubel variety in 3-yr., extra select, Balled and Burlapped roots. **2 for \$2.75; 4 for \$5.20; 10 for \$11.00.**

## Specimen Blueberry Plants

Note picture at left. This shows you a 7-year-old Blueberry bush in full bearing that is really 9 years old from cutting. We are offering a very limited amount of these bushes that will bear 4 to 8 quarts of fruit the same year set. Shipped with all the soil attached, and burlapped. **The price is 2 for \$25.00.** Only 29 plants are being offered.

## BLUEBERRY VARIETIES

We can supply Blueberries this year in the following varieties: Rubel, Harding, Rancocas, Jersey, Pioneer and Concord. We reserve the right to substitute if we happen to be out of one or the other.

**PIONEER.** Plant vigorous, very productive, and hardy. Medium spreading habit of growth. Fruit large, firm, and of very good quality. Ripens midseason. Leaves turn dark red towards fall. Very ornamental. Called the Show Blueberry. Bears fruit in clusters.

**CONCORD.** Plant vigorous. Fruit is large and excellent quality. Upright grower. Bears fruit in clusters. Midseason.

**RUBEL.** One of the most vigorous growers, upright, very good grower, and the heaviest producers of them all. Fruit is large but a little tart. Good shipper. Leaves turn red in fall. Very ornamental. Fruit borne in clusters. Midseason.

**RANCOCAS.** Vigorous, upright grower. Very productive. Fruit sweet and fine flavor. Ornamental. Fruit borne in clusters. Midseason to late.

**HARDING.** This is the sweetest of them all. Spreading bush. Very productive. Berries are a little too soft for long distance shipping, but fine for home use. Fruit not borne in clusters, but all over the bush. Late ripening season.

**JERSEY.** Upright grower, vigorous, and very productive. Largest fruit of good quality. Midseason to late.

**Please Lend This Catalog to Your Neighbor**

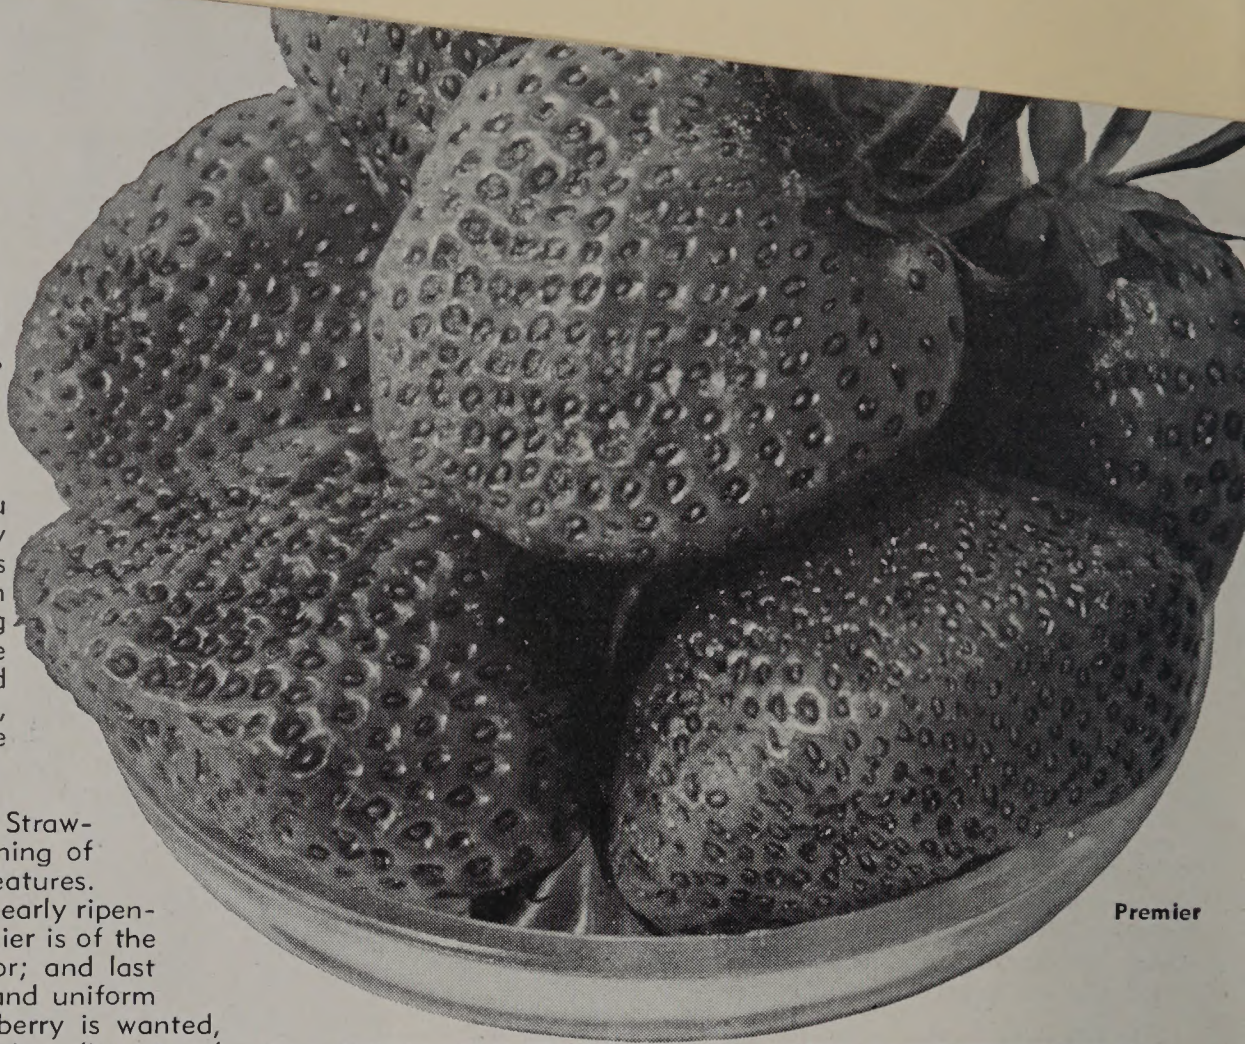

# Stromer's PREMIER

The Most Popular Berry  
Ever Introduced

If you plant STROMER'S PREMIER you will get the first berries on the market. They will be bearing heavily before other varieties begin. Your biggest picking will be when berries are in good demand and are bringing top prices. Premier will grow anywhere. The plants are sturdy and long rooted, a good drought-resister. The berries are very large, and hold their size to the last picking. The flavor cannot be beaten.

In Premier we offer you the greatest early Strawberry of all time. However, the early ripening of this variety is only one of its many good features. It is immensely productive, and unlike other early ripening Strawberries, the fruit produced by Premier is of the very finest quality, color, texture and flavor; and last but not least, every berry is large in size and uniform in shape. For every purpose that a Strawberry is wanted, Premier is supreme—eating, canning, preserving, distant and local market—no other variety can give you any more pleasure, satisfaction or profit. Premier succeeds everywhere and never fails to give a big crop of the very finest berries. The foliage is tough and healthy and grows tall and rank, covering the blossoms and berries, and protecting them from frost and scalding sun.

# Catskill

Has Been Known to Outyield  
Even Dorsett and Fairfax

est we have ever seen on any Strawberry plant. Fruit stems are thick and grow upright. Berries ripen midseason, and quality compares with Aroma and Blakemore. It was introduced by the New York Experiment Station several years ago, and we have great hopes for it. Plants are still quite scarce and our supply is limited. State certified plants of this variety are priced as follows:

Berries average about as large as Fairfax. Will hold their size well to the end of the picking season. Makes a fine, vigorous plant growth. Leaves are the large-

## SURPLUS Strawberry Plants

**\$3.95 per 1000**

During our digging season there are a few plants of all varieties left at the end of the day. We offer them to you who do not care to have named varieties, at \$3.95 per 1000. We will not label these plants. They are first class and fresh dug. No overbearing at this price. See page 9 for overbearing surplus plants.

NO DISCOUNTS

## Grand Champion

(ALL SEASONS)

Greatest money-making Strawberry ever introduced, no crop failure an account of frosts. Has produced over 5000 quarts an one-half acre in spite of heavy spring freezes.

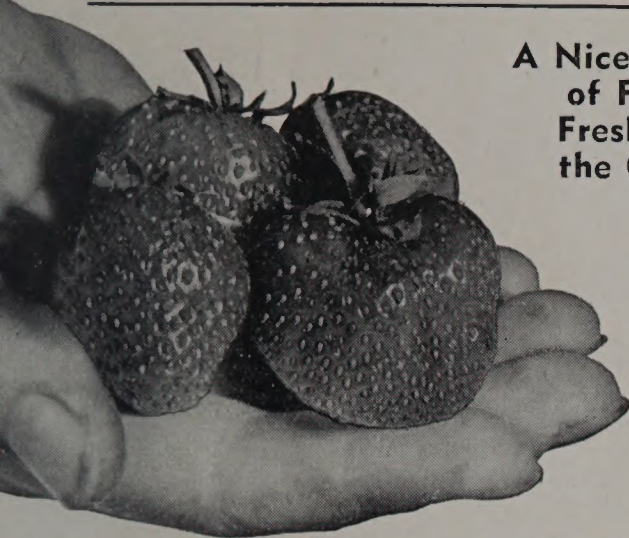

**ALL SEASON BEARER.** Commences to ripen with the Premier, the earliest berry, and produces fancy berries with the Aroma, which is a late berry. Plants are large, extra heavy, healthy foliage; berries are bright red, very large in size, and have a fancy appearance. By all means try a few in your locality. Supply is very limited. Order early to avoid disappointment.

| 400  | ..... | 2.80   |
| 500  | ..... | 3.25   |
| 1000 | ..... | 6.50   |

It is considered by most everyone who has tasted them to be by far a better flavored berry than Premier, and other good flavored berries. FAIRFAX, like DORSETT, was introduced by the United States Department of Agriculture, and is supposed to be a cross between the Premier and the Royal Sovereign. The foliage is of a very good quality; good foliage means a good fruiting berry. Fairfax is also a very productive berry, having produced at the rate of 5120 quarts per acre. The size of the berries averages large. They will average with the Chesapeake, and that is going some. Fairfax is a little more firm than Dorsett, and is fully as firm as Blakemore. This makes it a wonderful shipping berry. The color of the Fairfax is light red, with yellow seeds, and a nice green hull, making a beautiful combination. You should by all means try some Fairfax this spring.

Black

## BLACK STRAWBERRY

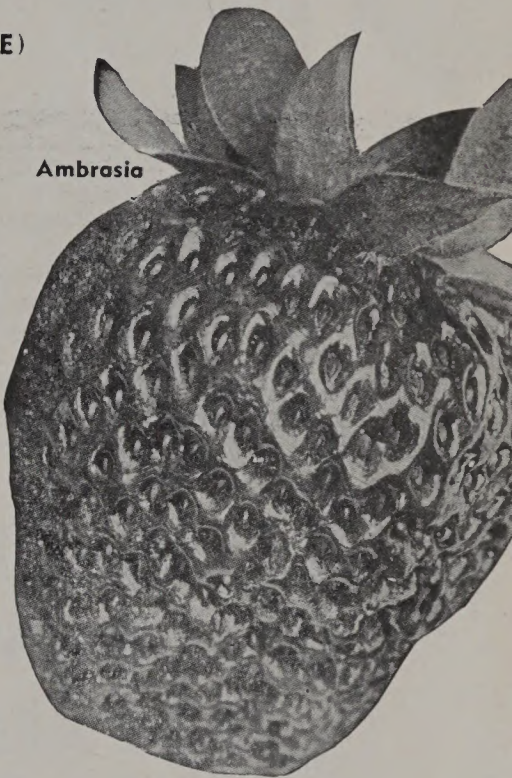

This berry is so dark red that we call it Black. The flavor is good and sweet. These almost black berries are large, nearly round, and of the finest quality. Ripens midseason. One of the finest berries for canning and jam making, and will take no back seat for any variety when it comes to cream and sugar. Supply limited.

**BLACK PRICES**

## AMBROSIA (LATE)

The Ambrosia Late is absolutely the very best late Strawberry that we have today. It is also the very largest Strawberry that we have ever grown. Thirty berries are known to fill a quart box. Plants grow tall and vigorous. Have seen them growing on good land, where the leaves and fruit stems would be 14 inches tall. As the berries ripen and get heavy, the fruit stems will turn down, and what a sight to look at, when you brush the leaves to one side. At last we have found a real good late Strawberry to lengthen the Strawberry bearing season.

## BLAKEMORE (EARLY)

The United States Department of Agriculture Recommends It  
This wonderful new creation called the BLAKEMORE (U. S. D. A. No. 659), was originated from a cross of the Missionary and the Premier in the year 1923 by the United States Department of Agriculture. The berries are much firmer than the Premier, Missionary or the Klandike. The BLAKEMORE are slightly blunted conic with broad shoulders and slim neck. The shape of the BLAKEMORE might vary same in different localities. Easy picking and hulling qualities. The berries are a beautiful bright glassy red color, with tough skin, firm flesh, with wonderful mild flavor. Plants make runners freely, and you are sure of getting a good fruiting row. They should be set about 24 inches apart. If set closer than that they will get too thick. It has been tried out and found to be one week earlier than Premier. It is a wonderful market berry. Why wouldn't it be? Think of it—one week earlier than Premier.

Ky. Aroma

## KY. AROMA

(VERY LATE)

This late Strawberry has long been a favorite market variety in Kentucky, Tennessee, Missouri and Arkansas, but is grown with equal success in every other part of the country. Usually commanding premium prices on all markets, it is one of the greatest of long distance shippers, owing to the supreme quality of the berries. It is also highly desirable and suitable for home use as there is something indescribably rich and pleasant about the flavor that commands the admiration of all.

## SENATOR DUNLAP

(MIDSEASON)

SENATOR DUNLAP IS AN OLD STANDARD VARIETY. It has made more crates and more dollars for berry growers than any other one variety. Requires very little attention. It's the toughest variety known. Plants are healthy, fast growers, and make plants freely. Should be set 24 inches by 36 inches apart in rows. Berries very dark red. Wonderful canning berry; great for preserves. Senator Dunlap is sometimes sold under the name of Dr. Burrill. We can see no difference between these two varieties, except the cost of the plants.

# Giant Improved Strain MASTODON

## Everbearing Strawberries

**3 Full Crops in 18 Months**

**3 Big Profits**

When we tell you that **Mastodon** does produce three full crops in 18 months; it is the largest berry grown; bears in 60 days after planting; is an excellent shipper; brings more per quart; and is a delicious home use berry—you probably won't believe it unless you have grown them yourself—and we don't blame you, but read what other folks have to say.

Mastodon does not require special soil, care or petting. Sell for 30c to 50c per quart. Mastodon sells like "hot cokes" on roadside stands. Commences to bear in 60 days after you set them. We picked 181 quarts of berries from 1 1/2 acres on November 1st, and on November 2nd the ground was frozen solid. This frost is what stopped the Mastodon. Light frost will not injure them at all.

We often have folks ask us "How many quarts will 100 Mastodon give us a week?" We have watched our Mastodon fields this summer, and find that they will bear 3 quarts 2 times a week. If it is cool, they will not do quite so well. It takes about 8000 plants to set on acre, so that makes 480 quarts per week per acre, and sell for 25c per quart, making \$120.00 per acre per week.

### A REAL WONDER

It is the largest everbearing berry grown. **Mastodon** is the most prolific, the finest, the most beautiful berry with the real Strawberry flavor. It is a berry that bears early and late; one that can be picked all spring and summer. Many of the berries grow as large as a silver dollar, and are just as perfect. **Mastodon** is the real marvel in Strawberries; nothing like it has ever been known. Plants that were set in May this year have produced as high as 3 quarts per plant. A field of this **Mastodon** in bearing is a sight never to be forgotten.

### Here's How Mastodon Does It

- 1 Plant this spring—1939.
- 2 Pick first crop—July to winter—1939.
- 3 Pick second crop—June—1940.
- 4 Pick third crop—August to winter—1940.

Mr. Geo. Stramer.

Collins, N. Y., September 6, 1938.

Dear Sir: Last spring I purchased 2,000 Mastodon Everbearing Strawberry Plants of you. I set them out May 13th, and had the first strawberry shortcake July 20th. Berries were ripe 60 days after planting. People were amazed to see such wonderful plants. They beat the pictures in the catalog three to one. They look like year-old plants. I counted 46 berries on one plant and 45 on another plant of all sizes. I am selling Strawberries for 30c per quart. Yours very truly, ERWIN J. BECKERICH.

Mr. George Stromer.

Collins, N. Y., October 14, 1938.

Dear Sir: Again I am writing you in regard to the 2,000 Everbearing Strawberry Plants I bought of you last spring. On October 6th and 7th, 1938, the thermometer dropped to 20 degrees. The ground was frozen hard, and the water had ice three-fourths of an inch thick on it. The neighbors said that killed the Strawberries, but not one berry was hurt. I picked them and sold them to Cecil Pendleton's, of Collins, N. Y., for 30c per quart. And Belle Pendleton and Francis Beckerich, both of Collins, N. Y., counted 63 berries on one plant. They believe the plants would bear berries at the North Pole. I sold 12 quarts of Strawberries on September 30th at 30c per quart. The color and size were grand.

Very truly yours, ERWIN J. BECKERICH.

# GEM GIANT EVERBEARER

**Bears 60 Days After Planting**

Three full crops in 18 months. GEM is a direct offspring of the old Progressive Everbearing Strawberry. Mr. Frank Keplinger, of Central Michigan, found a single plant growing in his Progressive field, and he guarded it till he had plants enough of it to offer to nurserymen. It is one of the greatest everbearing Strawberries ever introduced because it is so sweet and firm. Berries are lang, and we find them to be fully as productive as the Mastodon. Berries ripen evenly and are light red all the way through. The young runner plants will bear as well as the mather plant, so this makes it very productive.

# Famous DORSETT

**6640 Quarts to the Acre**

This new variety was originated by the United States Department of Agriculture. It is a cross between the PREMIER and the Royal Sovereign, an English variety.

Dorsett is one of the finest berries known, and one of the heaviest producers, having produced at the rate of 6640 quarts per acre in the East. The foliage is a very dark green and holds this fine color way through the fruiting season. Dorsett berries average very large in size, even a little larger than Premier. Color is of light red, and will hold this light red color long after picking. This probably will be a big factor when you market them on the wholesale markets, as that is what the wholesale fruit buyers are looking for in the past few years. Light red berries always appear to be in better shape than da dark red ones. Be sure to try a few of the plants this year. Dorsett is now the leading berry for all purposes.

## Washington Asparagus

There is no variety of Asparagus as good as Washington, and whether for home use only or for market, you cannot afford to grow any other. This wonderful new Asparagus was developed and introduced by the U. S. Dept. of Agriculture, and although a recent introduction, it has become famous the country over.

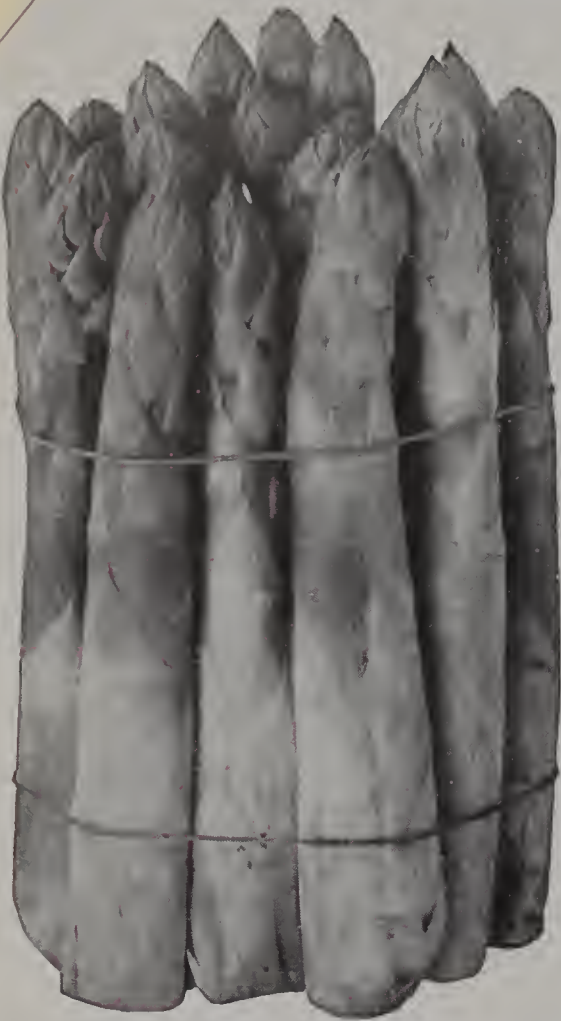

Growers everywhere are discarding all other varieties in favor of Washington, because it is earlier, the stalks are larger, more tender, more productive than any other variety, and last but not least, WASHINGTON IS IMMUNE FROM RUST.

Hansen Bush Cherry

## HANSEN BUSH CHERRY

The New QUICK-BEARING CHERRY—Highly Productive  
GOOD FLAVOR—HARDY Everywhere

Though the fruit of this new Cherry much resembles a Plum in size and shape, it comes massed in clusters and at times almost completely covers the limbs. The tree itself grows in a sort of dwarf bush-like shape, rarely getting over four or five feet tall. In landscape planting these Bush Cherries are also desirable as they are of striking ornamental value.

Prices: 50c each; 3 for \$1.00. 3-year-old plants ready to bear.

### Plant These Hansen Bush Cherries Because:

- 1—They are so easy to grow and are perfectly hardy everywhere.
- 2—Are good to eat fresh, and make delicious preserves.
- 3—Bear from the ground up, early, heavily, and annually.
- 4—Are dwarf growing, bushy, and take up little room.
- 5—Excellent for hedges, ornamental shrubs and erosion control.

## BLACK WALNUT

This is the common black walnut, which will grow anywhere, and is always a favorite. Bears large nuts, which are valuable in making cookies, cakes and candies. The kids will eat them as fast as you can crack them. Trees, 3- 4-ft. tall, 25c each; 3 for 65c; 6 for \$1.20; 10 for \$1.85.

SEE FREE PLANT  
OFFER, PAGE 2

## Stromer's Giant Cherry Rhubarb

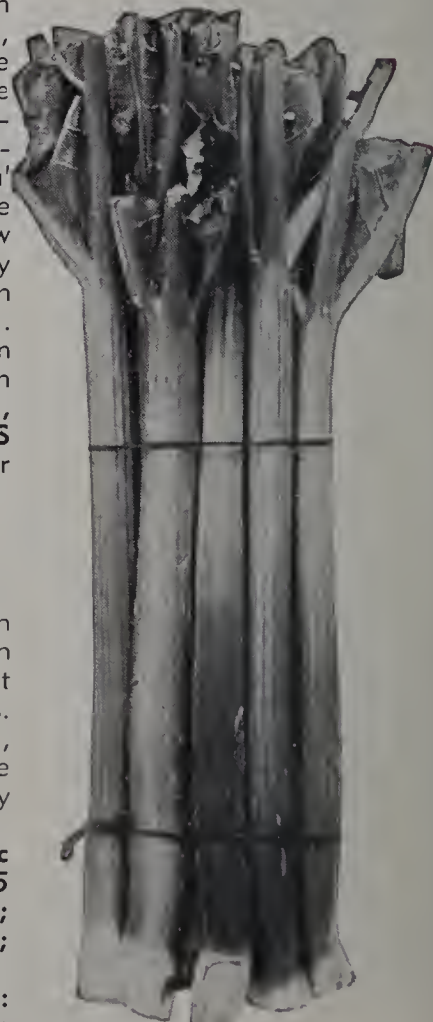

Before, Rhubarb was just Rhubarb, but now it is different. Stromer's Cherry Rhubarb is the one **best** Rhubarb of them all. This is a long-season Rhubarb. It will start to grow very early in the spring, and you can still be pulling it in late September. The color of the stems is a brilliant red, often three feet tall, depending on the soil. Twelve to fifteen of these long bright red stems on a plant at a time. Older plants have been known to bear fifteen pounds to a picking. It is less acid, and a much better flavor than the ordinary kinds. The stems are large and require less cooking without peeling them, and much less sugar. Commercial growers are making real money with this variety, and home gardens will find it the best to grow hereafter. Four plants will be plenty for a family of five. Set as early in the spring as possible on good rich soil. Cherry Rhubarb cannot be grown from seed. We offer nice nursery-grown roots at the following prices. **Each, 35c; 4 for \$1.00; 12 for \$2.50, LESS DISCOUNTS.** If interested in larger lots, please write for prices.

## Myatt's Linnaeus Rhubarb

Myatt's Linnaeus Rhubarb is an early, tender, fast growing kind, with a mild sub-acid flavor, and is not tough and stringy like most sorts. Plant some of this Rhubarb this spring, and make some early money. We are offering select No. 1 roots at a very low price.

1-year, No. 1 roots: 10c each; 40c for 6; 65c for 12; \$1.20 for 25; \$2.25 for 50; \$4.00 for 100; \$7.50 for 200; \$10.50 for 300; \$15.00 for 500; \$30.00 for 1000.

Extro heavy, 2-year clump roots: 25c each; 70c for 6; 95c for 12; \$2.00 for 25.

Cherry Rhubarb

A Concord Vine Ready to Pick

Niagoro

## NIAGARA (White)

This is the Great White Grape that succeeds everywhere and under all conditions. In fact, it is really the White Concord, as it seems to have all the good characteristics of that great variety, being equally as vigorous, hardy, and productive. Due to the tough, leathery foliage, Niagara is practically immune to fungous diseases. It is one of the most delicious and beautiful of hardy Grapes and sells at fancy prices. Berries are large; bunches large and compact; color greenish yellow when fully ripe; juicy, sweet and delicious. Whether planting for home use or market, include Niagara in your order. Prices above.

## CONCORD (Blue)

Concord is without doubt the most productive, the most popular and profitable variety yet introduced. It is the standard of excellence, quality and comparison on all markets, and buyers everywhere pay a premium for this superior quality Grape. Concord is perfectly hardy, having withstood a temperature of 30 degrees below zero without injury, it will produce more fruit per acre than any other variety and does well on light or heavy soil. The bunches are large and compact, berries large, bluish black color; sweet and juicy; fine quality and flavor. In fact this variety is the one all-purpose Grape.

## NEW BETA BLACK GRAPE

Bunch large and compact. Berries of medium size, first in quality. Very early. The vine is a very rank grower, exceedingly hardy and a tremendous bearer. Very popular in the Northwest, where only the earliest and hardiest varieties succeed.

## DELAWARE RED GRAPE

A rich and delicately flavored little red Grape that is generally recognized as the standard of quality to judge other Grapes by. An exceptionally desirable variety for home gardens on account of its compact habit of growth. Commands a premium in all the markets, often selling for twice the price of Concord. Very hardy. Ripens here about the middle of September.

## PORTLAND

A new white grape developed in Fredonia, N. Y. Ripens earlier than any other known grape, which permits its being planted over a wide range of territory. Berries large, and have that beautiful yellowish color. Quality excellent, equal to the Niagara and other later Grapes. It contains much sugar and can be eaten before it is fully ripe. Vine hardy and productive. You will be pleased with this new Grape. Makes a beautiful showing with Fredonia.

# CACO

THE NEW  
RED GRAPE

This is the new, quick growing, young bearing, early ripening, deliciously sweet, big red Grape that has created sensations in nearly all of the large Grape growing centers of the country.

As a variety far hame use, leading horticulturists and experiment stations claim it has na equal, and we will vouch for this statement.

Caco has a peculiar characteristic not found in any other variety, in that it is so rich, melting, sugary and excellent in flavor that it can be eaten with rare enjoyment fully two weeks in advance of being fully ripe.

In appearance it is the mast beautiful of all hardy Grapes, passsing a rich wine-red and amber calaring. The berries are usually large; bunch large and compact.

The vines are very strong, perfectly hardy, vigorous growers, healthy and prolific; ripening as it does early in September, the big crap is fully matured before danger of frost.

Always in demand on all markets at extra fancy prices. If you have a roadside stand, you will make money with Caco. They will be back for more.

# Fredonia

This new Black early Grape was originated by the New York Experiment Station and it's a dandy. The bunch and berries are large, compact and well shaped. The flavor is excellent, and it is just the variety you should plant for home use as well as for commercial purposes. It will replace the Concord as soon as plants are available. It ripens 15 days before the Concord, and is an excellent shipper. Every Fredonia plant you set out will be a lifetime investment.

# GOLDEN MUSCAT

This new hardy California Grape can now be grown in every section of the cauntry. This variety is the result of the cross of the Muscat Hamburg and Diamond, which are very desirable in themselves. This crass makes a very hardy, heavy bearing vine, and the quality of the fruit is similar to the white California Grape sold at all fruit markets. The berries are large, sweet and meaty, making it a wonderful variety to grow for home use and roadside stands. The bunches are large, heavy, broad shouldered, and tapering. Very compact. On account of this Golden Muscat being such a productive plant, we advise a good complete commercial fertilizer every spring, and you will be delighted with the crop. Supply of plants still limited. We offer nice, strong, 2-year-old, No. 1 plants. Will bear year after set. Price, \$1.25 each; 2 for \$2.25; 5 for \$5.00.

MARCY →  
The Largest  
Red Raspberry  
in the World

Indian Summer Everbearing

Cumberland

Golden Queen

Taylor

Latham

For Descriptions  
and Prices  
See Pages  
14 and 15

## TAYLOR *Red Raspberry*

The berries are very large, much larger than Latham, hold up well through a long season. It has a long conic shape and is of a bright red color with a complete lack of crumbling, which adds materially to the appearance and attractiveness. The firm, thick flesh and the very small cavity make it the ideal shipping berry. Flavor is sub-acid, of the highest quality, which is equal to Latham. Ripens the same season as Latham and bears an enormous crop. They do not cling too tightly to the bushes.

The Taylor fills a long-felt desire for a perfect Red Raspberry.

## SODUS *Purple Raspberry*

The Sodus is the most promising early Purple Raspberry. The berries are very large and firm, with good quality, and do not crumble as Columbian do. Plants are very vigorous and bear an unusually large crop, much more so than one can imagine, and up to the present time we have noted no winter injury whatsoever. Unlike our older purple varieties of Raspberries, we find them practically 100% free from diseases, and where Purple Raspberries are grown for commercial or home use, this variety should replace the present varieties.

## NEW LOGAN *Black Raspberry*

**Most Dependable Early Black Raspberry.** This variety, through sheer merit, has replaced very nearly all of the standard kinds. The berry ripens one week earlier than Cumberland, giving the grower a chance to make some real money before Cumberland comes into bearing. It is an extra heavy yielder, with berries as large or larger than Cumberland.

## QUILLEN *Black Raspberry*

**The Latest Blackcap.** Comes into bearing after all other varieties are practically through. Fruit very large and of fully as good quality and texture as Cumberland. Practically immune to mosaic, anthracnose and other serious diseases. This variety shows great merit in all sections of the country, and we urge you to give it a trial.

## GOLDEN QUEEN *Raspberry*

A beautiful, large, golden yellow Raspberry. Many prefer this variety to any of the red or black sorts, owing to its sugary sweetness and unsurpassed flavor. Should be in every garden, its beauty and high quality placing it at the head for table use. The canes are hardy, of strongest growth and very productive.

Prices: 1-yr., No. 1, 20c each; 6 for 90c; 12 for \$1.50; 25 for \$2.50; 50 for \$4.50; 100 for \$7.50. 2-yr., No. 1, bearing age, 35c each; 6 for \$1.85; 12 for \$3.00; 25 for \$4.50.

## CHIEF *Red Raspberry*

A very popular early variety. Offspring of the famous Latham. Has proven hardy, disease resistant, a heavy cropper, of excellent quality and a good shipper. Berries large, rich bright red. Ripens ten days earlier than Latham, bridging the gap between Strawberries and ordinary Raspberries.

## ST. REGIS *Everbearing Red Raspberry*

One of the most valuable of all red Everbearing Raspberries. The habit of growth is of a bushy nature; will produce berries the first year in the fall, and a full crop the following spring and again in the fall.

St. Regis resembles Chief; its fruit is similar to that variety in quality, flavor and appearance. In September, long after Raspberries are out of season, St. Regis will bear a full crop of fruit, which commonly sells for seven or eight dollars for a 24-pint crate. If you have a market at hand where you can dispose of the fruit, you will find St. Regis a very profitable investment when grown on a commercial scale. If you have not the time or the ground to grow St. Regis for market, be sure to plant at least a few bushes in the garden and keep your table supplied with all you can use.

## MARCY *New Red Raspberry*

Marcy was the largest of all red Raspberries grown at the New York Experiment Station, and the size holds up well throughout a long season. The shape is long, conic, and flesh moderately firm and thick, with only a small cavity, making the variety a good shipper. Color is medium red. Flavor mild. Plants are tall, sturdy, vigorous, and hardy, with stalky canes that hold the fruit well off the ground. Actual tests show that Marcy is the biggest of all the leading varieties.

## CUMBERLAND *The Business Black Cap*

This is without question one of the most profitable and popular Black Raspberries ever grown. It is the one safe and reliable commercial variety because you can depend on a big crop regularly. We call it the "Business Blackcap" because it succeeds on all soils and produces its big crop year after year.

We have never known Cumberland to fail, and the best proof that it is a profitable variety is the fact that the demand for plants is greater every year and more Cumberlands are planted than all other varieties combined.

Cumberland is perfectly hardy and tremendously productive. The berries are extra large, glossy black, and not equaled by any other variety in quality, flavor or appearance, except Logan. Whether wanted for market or home use, we can recommend Cumberland to our most exacting customers. Disease-free. Twice state inspected plants.

## INDIAN SUMMER *Everbearing Red Raspberry*

This new Everbearing Red Raspberry will bear two crops a year. One crop in the summer the same as any other variety, and another crop in the fall on the new wood. Commences to bear in September and will continue till frost. The berries are very large, conical shape, and of a beautiful bright red color. Sell for 35 cents a pint in the fall and there is some real money to be made for the one who plants these Indian Summer plants this spring. Plants are vigorous, hardy, and disease free. Think of having some delicious red Raspberries to eat and sell from September till winter.

## NEWBURGH *A New Red Raspberry*

Introduced by the New York Experiment Station. The plants are heavy and stocky, the canes do not grow quite as tall as some of the other varieties, but carry a large load of berries. In New York state they have yielded 30% more fruit than other varieties; so far Newburgh has proven immune from mosaic, is very hardy and easy to grow.

The berries are larger than other varieties, their size holds up well during their long picking season. The firmness and freedom from crumbling make Newburgh a good long distance shipper and market variety. The color of the berries is a lighter red than that of Latham, flavor and quality is easily on a par with Latham.

## LATHAM *Big Red Raspberry*

The Raspberry Plant  
Crop is Very  
Short This  
Year

We unhesitatingly recommend Latham as one of the best Red Raspberries ever grown. This variety originated at the Minnesota State Fruit Breeding Farm and is being grown extensively in Minnesota, the Dakotas, and Canada, and has never been known to winter-kill even though exposed to 45 degrees below zero. Latham is a tall, vigorous grower, canes extra heavy, foliage dark green, entirely free from disease. Ripens with Newburgh and is enormously productive. Berries much larger than any other Red Raspberry, many of them one inch in diameter. Color good, quality of the best, full Raspberry flavor. Excellent for shipping or home use.

LUCRETIA  
The Big Hardy Dewberry

The only real good Dewberry on the market which is good for all purposes, being very productive, of extra large size, earlier than any of the rest, will grow and thrive on very light soil and live for many years. If you live in a locality where your thermometer registers seven degrees below zero, you can easily prevent the vines from winter-killing by laying down on the ground and covering them with straw, which can be held in place by just a few shovels of earth. Then in the spring they can be taken up and tied to wires which are fastened just like a grape trellis, but not so high, something like three feet high is about right. Dewberries make a good addition to your blackberry list, you will like them as well or better for all uses than the common run of blackberries, and ripening early, you get the advantage of higher prices; as the berry is much larger, you can pick a crate quicker. They grow practically free from all diseases.

5. A good Strawberry for your garden.
6. Also makes a nice hanging basket and porch box plant.
7. They will stand the winter the same as any other variety.

Plants ready for delivery March, April and May.

This Strawberry is the creation of a European plant specialist and is the result of 35 years cultivation. It is of small fruited type and produces compact plants without runners.

Plant out the plants after the danger of real cold is over. They will make large plants by fall for 5-in. and 6-in. pots.

15c each; 6 for 80c; 12 for \$1.50, postpaid.  
Order early, supply limited.

ALFRED Blackberry  
STANDS 35° BELOW ZERO

GEORGE STROMER—Originator

Year after year, with diligent care, I have propagated these plants to such an extent that the fruit is now being supplied to the local markets at a fancy price, and is always in good demand. Last year I measured a good many berries that were over one and one-half inches long, and three inches around. Nurserymen claim that the ALFRED is the largest berry they have ever seen. Buy from the originator and get GENUINE ALFRED.

Lack of space forbids describing in detail the many good points of this variety; however, I wish to call your attention to the outstanding reasons why the ALFRED is superior to all other varieties.

**BEARS SECOND SEASON.** ALFRED is such a healthy, vigorous grower that it produces a good crop of berries the year following planting. It is not unusual to pick 10 to 40 berries from the bush the same year planted.

**IMMENSE SIZE.** The berries are twice as large as ordinary Blackberries, many of them 1½ inches long, and the finest flavored of all Blackberries. It is an ideal table berry because it is practically CORELESS, sweet and delicious. It is very small seeded.

**EXTREMELY HARDY.** ALFRED can be grown anywhere without winter protection, having withstood 30 degrees below zero, and not a single tip of a branch injured, while other varieties were frozen to the ground.

**EARLY SEASON.** This is one big feature of this variety. It ripens a week to ten days earlier than Eldorado and in productivity it is in a class by itself. We have seen them bear a second crop. We picked many cases this year in September.

New YOUNGBERRY

This new berry is so much different from any berry that is grown in most parts of the country. It is a cross between the Loganberry and Dewberry. Color of fruit is a rich wine color. Size 1 to 1½ inches. Flavor is pleasant, sweet, with the tartness of the blackberry. Excellent for table use, canning, jellies, pies, and for wine. The plant is a rank grower. Withstands cold and heat, adapted to a wide range of soils, a great producer. Try them in your locality. They will be the talk of your neighborhood. Plants are still scarce, and a little high in price.

## POTOMAC

The brand new variety of raspberry. Introduced by the U. S. Department of Agriculture. It is a cross between a black Raspberry and a red Raspberry, making it a purple Raspberry. Compared side by side with Cumberland, showed about twice as many berries on the Potomac as the Cumberland. Less berries were required to fill a quart of Potomac than a quart of Cumberland, so that will give you

an idea as to the size of the berries. It is very free from diseases. Makes fine jellies and preserves. It is the very best of all the purple varieties. We still have a very limited supply of plants of this variety to offer.

## SWEET SEPTEMBER (New Fall Bearing Cherry)

Ripens September first and hangs until the snow flies

The young trees start to yield some fruit the second or third year after planting and produce heavy annual crops thereafter. There is no previous record in the history of Horticulture of a fall-bearing Cherry, until the accidental discovery by an amateur horticulturist in northeastern Ohio of this sweet Cherry tree, which for some unknown reason ripened its fruits in September instead of June. The tree blossoms at the same time as other standard varieties and is apparently hardier in the bud than the average sweet Cherry. The fruits are an attractive medium dark red similar to Windsor, the standard variety which it most nearly resembles, and the quality is excellent for eating fresh and for canning.

It is a remarkable fact that the original tree, which now stands about 30 feet high and approximately the same measurement across, has produced a crop year after year, even as high as 15 bushels as it did in 1932, with practically all fruits sound and perfect in every way—no worms, rot or leaf spot—without ever having been sprayed.

Here is a fruit that every home owner should have in his doorway to extend the season for sweet Cherries through the late summer and autumn.

## MONTMORENCY (Pie Cherry)

This is one of the best of all pie Cherries. It ripens about 10 days later than Early Richmond. Fruit extra large, bright shiny red, firm flesh, juicy, and a fine home use and market variety. Trees grow strong and are perfectly hardy. They bear in 2 or 3 years, and continue to do so for many years.

| PRICES:               | Each   | 3      | 10     | 25     |
|-----------------------|--------|--------|--------|--------|
| 2-yr., 9/16-in. trees | \$0.75 | \$2.15 | \$3.95 | \$6.00 |
| 3-year-old trees      | 1.25   | 3.50   |        |        |

## EARLY RICHMOND (Pie Cherry)

This is the earliest of all pie cherries. Fruit is medium large, bright red and juicy. Ripens early in June. Fine for canning and pies. Starts to bear very young, and is very hardy. The kids will thank you if you plant a tree or two of this variety. Nothing will be more popular with them than a tree full of Early Richmond in early June. Ripen with strawberries.

| PRICES:               | Each   | 3      | 6      | 10     | 25      |
|-----------------------|--------|--------|--------|--------|---------|
| 2-yr., 9/16-in. trees | \$0.75 | \$2.15 | \$3.95 | \$6.00 | \$13.75 |
| 3-year-old trees      | 1.25   | 3.50   |        |        |         |

## BLACK TARTARIAN (Sweet Cherry)

Fruit very large, bright purplish black, juicy, very rich and of excellent flavor. The tree grows vigorously, and is very productive. Fruit ripens last of June to early July.

| PRICES:               | Each   | 3      | 6      | 10     | 25      |
|-----------------------|--------|--------|--------|--------|---------|
| 2-yr., 9/16-in. trees | \$0.75 | \$2.15 | \$3.95 | \$6.00 | \$13.75 |
| 3-year-old trees      | 1.25   | 3.50   |        |        |         |

## YELLOW GLASS (Sweet Cherry)

Fruit very large and heart-shaped. Color is a pale yellow with a light red cheek when exposed on the sunny side. Flesh is firm, rather brittle and of fine flavor. Pit small. Ripens in July. Trees vigorous and hardy. The best yellow.

| PRICES:               | Each   | 3      | 6      | 10     | 25      |
|-----------------------|--------|--------|--------|--------|---------|
| 2-yr., 9/16-in. trees | \$0.75 | \$2.15 | \$3.95 | \$6.00 | \$13.75 |
| 3-year-old trees      | 1.25   | 3.50   |        |        |         |

## SUPERB APRICOT

A hardy tree and a sure cropper. The best flavored, most productive hardy Russian Apricot yet produced. Medium size, light salmon color.

| PRICES:               | Each   | 3      | 6      | 10     | 25      | 100     |
|-----------------------|--------|--------|--------|--------|---------|---------|
| 2-yr., 9/16 in. trees | \$0.65 | \$1.80 | \$3.25 | \$5.00 | \$12.00 | \$47.00 |

## DOLGO CRAB APPLE

The perfect Crab. Hardy everywhere. Heavy bearer, usually beginning the year after setting. Jells perfectly even when dead ripe. A fine ornamental tree for the lawn as well as a wonderful commercial sort. Rapidly displacing such varieties as Transcendent and Hyslop. Bears young.

| PRICES:                  | Each   | 3      | 6      | 10     |
|--------------------------|--------|--------|--------|--------|
| 2-yr., 9, 16-in. trees   | \$0.65 | \$1.80 | \$3.25 | \$5.00 |
| 3-year old, \$1.00 each. |        |        |        |        |
| Less Discount            |        |        |        |        |

## SURE CROP NECTARINES

Fruit as large as peaches, but entirely fuzzless. Golden-orange with blazing red blushes. Strikingly beautiful, and richly flavored. Combine peach and apricot flavor. Trees hardy as peaches, easy to grow.

| PRICES:                   | Each   | 2      | 6      |
|---------------------------|--------|--------|--------|
| 2-yr.-old, 9/16 in. trees | \$0.95 | \$1.80 | \$4.80 |

## WILDER CURRANT

A real improvement in Currants. Big berries in long, well-filled bunches. Bushes thrifty and very productive. Brings top prices. A splendid money-maker. Fine for jellies and pie.

| PRICES:      | Each   | 3      | 6      | 10     | 25     | 100     |
|--------------|--------|--------|--------|--------|--------|---------|
| 2-yr., No. 1 | \$0.35 | \$1.00 | \$1.75 | \$2.70 | \$6.25 | \$15.00 |
| 3-yr., No. 1 | .50    | 1.20   | 2.00   | 3.50   | 7.95   | 20.00   |

## CHAMPION GOOSEBERRY

Very large berries of delicious flavor produced freely on the sturdy, hardy bushes. Best pie variety. Bushes not very thorny.

| PRICES:      | Each   | 3      | 6      | 10     |
|--------------|--------|--------|--------|--------|
| 2-yr., No. 1 | \$0.35 | \$1.00 | \$1.75 | \$2.70 |

## RED LAKE CURRANT

This new, better, and extra hardy, large red Currant comes from Minnesota. This really is the last word in Currants, and you will want a few plants of them even if you have plenty of them now. The large long clusters of juicy bright red berries make up into a beautiful bright red jelly. On account of the heavy bearing qualities Red Lake is the best commercial variety. Ships well, and holds up well. Plants are vigorous growers.

| PRICES:      | Each   | 3      | 6      | 10     | 25     | 100     |
|--------------|--------|--------|--------|--------|--------|---------|
| 1-yr., No. 1 | \$0.35 | \$1.00 | \$1.75 | \$2.70 | \$6.95 | \$25.00 |

Currants and Gooseberry plants can be sent to the following states only: MICHIGAN, INDIANA, ILLINOIS, IOWA, WISCONSIN, MISSOURI, OHIO, and MINNESOTA.

## CRYSTAL WHITE BLACKBERRY

Strange as it may seem, this is a real creamy white Blackberry. Mixed with the jet black ones for dessert, it makes a most wonderful dish. The fruit is about the size of Alfred, with few seeds and quite sweet when fully ripe. The bushes are good, strong growers and very productive. This is not a worthless novelty, but a fruit of real value, and should be in every garden.

| PRICES:       | Each   | 6      | 12     | 25     | 100    |
|---------------|--------|--------|--------|--------|--------|
| 1-yr., No. 1  | \$0.10 | \$0.35 | \$0.75 | \$1.25 | \$3.50 |
| 2-yr., No. 1  | .35    | 1.85   | 3.00   | 4.50   |        |
| Less Discount |        |        |        |        |        |

## FLOWERING CRAB

The following varieties of flowering Crabs are very valuable, as they produce attractive flowers and fruit which will attract the bees and birds. Where Cedar trees are plentiful, do not plant the Bechtel variety.

**BECHTEL.** A beautiful, fragrant, double, pink-flowering Crab. Blooms in May and June. Not much fruit. Attains height of 12 to 15 feet.

**PARKMANI.** A bright rasy red fragrant double flower. Blooms April and May. Height 18 to 20 feet.

**ALDENHEIMENSIS.** A smooth reddish bronze, foliage buds crimson-pink opening to brighter vinous red. Semi-double flowers. Fruit deep reddish purple. Height 15 feet. April-May.

**BEAUTY.** A fine pink-flowering Crab, blooming in April, and followed by an abundance of cherry-red fruit. 25 to 30 feet.

**HOPA.** A beautiful upright growing tree with attractive foliage. Entirely covered with rose colored flowers in April. The fruit is scarlet-red inside and out, and hangs on the tree till late in the fall. One of the best, we believe. 20 to 25 feet.

**SARGENT CRAB.** A spreading Japanese variety. Pure white flowers with yellow anthers. Scarlet fruit hangs till spring. 4 to 6 feet.

PRICES: Any above Flowering Crabs, 2- to 3-ft. trees, each, 75c; 3 for \$2.00; 6 for \$3.75.

COLLECTION: One of each of these fine Crabs for \$3.75.

## Japanese Flowering Cherries

These trees are like the ones along the Potomac river in Washington, D. C. Nated for their beautiful flowers.

**KWANZAN.** Double dark pink. Late blooming.

**MOUNT FUJI.** Semi-double blush-white.

PRICES: 3- to 4-ft., fine trees, each, \$1.50. One of each, \$2.75.

Hale-Haven

MARVELOUS  
New Peach

10%  
Discount  
IN JANUARY

5%  
Discount  
IN FEBRUARY

This marvelous new Peach was introduced through the efforts of the Michigan State Experiment Station, South Hoven, Michigan (Mr. Stanley Johnson, Supt.). It is a cross between the famous varieties South Hoven and J. H. Hale. A large, beautifully colored, yellow-fleshed Peach, ripening approximately 2 weeks before Elberta. A perfect freestone, strong, thrifty grower, splendid shipper and an extremely hardy, heavy bearer of exceptionally fine flavor. The Hale-Hoven has extremely high color and colors highly on the trees several days before it is ripe, thereby permitting picking while rather green, for distant ship-

ments. Test trees produced full crops this year at the Experiment Station when crops of many other standard varieties were a failure due to low temperatures last winter. This variety will make you big money and should be included in every planting.

FERTILE HALE

This new introduction was brought about by the Greening Nursery Co. It has been produced by bud selection and has been found to need no other variety to help pollinize it like J. H. Hale does. These Fertile Hale will produce full crops of beautiful Hales even more beautiful than the J. H. Hale. The Fertile Hale is far more hardy and productive in bud than the common J. H. Hale. At the experiment station in South Haven, Michigan, Fertile Hale came through with a crop when J. H. Hale and Elberta failed. Flesh yellow, with yellow skin with deep carmine blush. Good shipper. Freestone. Will bring the highest price on any market. Fertile Hale, like South Haven, are real money makers on account of their hardiness and fine quality. They are the two commercial Peaches to grow for profit and pleasure. Fertile Hale has a plant patent applied for. Our trees are the genuine.

| PRICES                    | Each   | 5      | 10     | 25      | 50      | 100     |

GOLD DROP

Beautiful golden yellow. Freestone. Sweetest of them all. Not very juicy. When canned the juice will be thick, requires less sugar. Not very much of a market Peach. You will sell all you can raise right around home. Everyone knows what Gold Drop is for canning.

| PRICES                    | Each   | 5      | 10     | 25     | 50      | 100     |

| (3-year-old, \$1.00 each) |        |        |        |        |         |         |

SOUTH HAVEN

This variety is the hardiest of all commercial Peaches. It is not only a very good commercial Peach, but extra fine for canning and table use. Our South Haven are from selected buds and are of a high yielding strain. The fruit is large, round, very uniform in size. Flesh is yellow. Color of skin is deep yellow with red cheek. Freestone. Ripens about 18 days before Elberta, and at just the right time to bring big market prices. It is absolutely the best canning Peach. South Haven makes a good variety to plant with others to help pollinize.

| PRICES                    | Each   | 5      | 10     | 25     | 50      | 100     |

| (3-year-old, \$1.00 each) |        |        |        |        |         |         |

ELBERTA

The fruit is very large, orange-yellow color, overspread with red. Flesh is yellow with red near the pit. Freestone. Juicy, firm, yet tender and fine for canning. Sweet and mild. Ripens about Sept. 10th to 20th, depending of course on the season.

| PRICES                    | Each   | 5      | 10     | 25     | 50      | 100     |
|---------------------------|--------|--------|--------|--------|---------|---------|

| (3-year-old, \$1.00 each) |        |        |        |        |         |         |

ROCHESTER

A yellow freestone Peach having the exceptional merits of being early, ripening about August 10th; extraordinarily sweet and early bearing. In other respects it compares favorably with the best standard varieties. Fruit is large, yellow in color, prettily blushed. Flesh sweet, juicy and of delicious flavor. It keeps and ships well. Tree a vigorous grower, hardy and an annual and prolific bearer. Season three weeks before Elberta.

HARDEE

U. S. Plant Patent  
No. 120

HARDEE TREE HAS BUMPER CROP AFTER 1934'S LONG 18° BELOW ZERO

Scientists Hail HARDEE as the Most Important Peach Discovery in Past 25 Years

The fruit is described by the Ohio state authorities as being "large to above large. The fruit is slightly elongated and characteristically pointed. It is an Elberta type, ripening with Elberta and a little later. It is yellow, freestone, highly colored and with firm flesh of the best quality." Its thick skin makes it an excellent shipper. The flavor of the fruit is distinct and delicious. It has a very real Peach flavor. The tree habit and vigor of growing is good indeed and may be classed as intermediate between Elberta and J. H. Hale. This Peach is sold under license of the patent holder.

| PRICES                      | Each   | 10     | 100     |

POLLY Peach

This is the hardiest of all white Peaches. Originated at the Iowa Experiment Station, withstands 20 degrees below zero. You folks who live out of Peach country should try Polly, and we are sure that you will have Peaches every year. Polly is a home use variety, as it will not stand long shipping. The fruit is large, white flesh, freestone, ripens a few days before Elberta.

| PRICES              | Each   | 5      | 10     | 25      | 50      | 100     |

AMERICAN MULBERRY

The Tree for the Birds

The rugged ornamental Mulberry tree should be in everyone's yard who grows cherries, strawberries and other fruit, to attract the birds away from these fruits. The birds will eat the Mulberries first. We offer the **New American Mulberry** which is a vigorous grower, and will bear heavy crops of blackish purple fruit from June to September. 4 to 5 foot trees. **Each, 75c.**

ORANGE QUINCE

We list only this one Quince as we consider it by far the best. The trees commence to bear very young and produce big crops. Fruit is excellently flavored and of large size.

| PRICES          | Each   | 3      |
|-----------------|--------|--------|
| 3-yr.-old trees | \$1.00 | \$2.50 |

GOLDEN ELDER

This bush will grow 6 to 8 feet, with beautiful golden yellow foliage all summer. Delicate white fragrant flowers are borne in masses in July, which are followed by black edible berries in August. Berries are fine for wine and pastries. Flowers also good for wine. 2- to 3-foot bushes, each, 45c; 3 for \$1.25.

# Stramer's Fruit Trees are Prolific

## HARDY PLUMS

### GERMAN PRUNE

The most delicious of all Plums. Extra large size, often 2 inches in diameter. Early and abundant bearer. Combines hardiness, immense size, delicious quality, long keeping, beautiful color, small pit. An early and prolific bearer, often producing a good crop in two years after planting.

2-year, 9/16-in. trees: Each, 75c; 3 for \$2.15; 6 for \$3.95; 10 for \$6.00; 25 for \$13.75; 50 for \$25.00; 100 for \$48.00.  
3-year-old trees: Each, \$1.10; 3 for \$3.00.

### ITALIAN PRUNE—A European Variety

Giant purple, oblong plum which ripens in September. Beautiful and very delicious. Regular cropper. Fine for drying, canning, storage.

2-year, 9/16-in. trees: Each, 75c; 3 for \$2.15; 6 for \$3.95; 10 for \$6.00; 25 for \$13.75; 50 for \$25.00; 100 for \$48.00.  
3-year-old trees: Each, \$1.10; 3 for \$3.00.

### YELLOW EGG—European

Fruit very large, prune-shaped, yellow with red dots. Fine for the table or cooking. Ripens last of August.

2-year, 9/16-in. trees: Each, 75c; 3 for \$2.15; 6 for \$3.95; 10 for \$6.00; 25 for \$13.75; 50 for \$25.00; 100 for \$48.00.  
3-year-old trees: Each, \$1.10; 3 for \$3.00.

### REINE CLAUDE (Green Gage) European

Large, round, greenish-yellow Plum with a marvelously sweet flavor. Almost lacking in acid. Tender yellow flesh. Improved Green Gage. Hardy, regular and heavy cropper.

2-year, 9/16-in. trees: Each, 75c; 3 for \$2.15; 6 for \$3.95; 10 for \$6.00; 25 for \$13.75; 50 for \$25.00; 100 for \$48.00.  
3-year-old trees: Each, \$1.10; 3 for \$3.00.

### UNDERWOOD—American (Hardy Hybrid)

This is the earliest of the large new Plums. Ripens from about August 1st to 15th, and attains a size of 1 3/4 inches. The tree is one of the strongest growers of all these new Plums and gets to be very large, furnishing a large bearing surface to produce wonderful crops of beautiful fruit. Fruit is very attractive; red, firm, juicy flesh, very small pit, freestone. Splendid quality.

2-year, 9/16-in. trees: Each, 75c; 3 for \$2.15; 6 for \$3.95; 10 for \$6.00; 25 for \$13.75; 50 for \$25.00; 100 for \$48.00.  
3-year-old trees: Each, \$1.10; 3 for \$3.00.

### WANETA—Prof. Hansen's Masterpiece

Has absolute hardiness, immense size, delicious quality, keeps well, is of a beautiful red color, yellow flesh, small pit, and starts to produce large crops at even two years old. A 4-year-old Waneta Plum tree has been known to bear four bushels. We can furnish these trees in 2-year-old and also 3-year-old.

2-year, 9/16-in. trees: Each, 75c; 3 for \$2.15; 6 for \$3.95; 10 for \$6.00; 25 for \$13.75; 50 for \$25.00; 100 for \$48.00.  
3-year-old trees: Each, \$1.10; 3 for \$3.00.

### BURBANK—Japanese

Large, round, golden and maroon Plum overspread with pretty bloom. Flesh is golden, sweetly and richly flavored, of fine texture and firm quality. One of the best for big crops, hardiness and dependability. Delicious fresh or canned or in jelly. Popular midseason shipping sort.

2-year, 9/16-in. trees: Each, 75c; 3 for \$2.15; 6 for \$3.95; 10 for \$6.00; 25 for \$13.75; 50 for \$25.00; 100 for \$48.00.  
3-year-old trees: Each, \$1.10; 3 for \$3.00.

### STANLEY PRUNE

This variety is a cross between Agen and Grand Duke. Excellent for cooking or eating out of hand. The tree is healthy, vigorous, and produces full crops annually. The fruit is large in size, prune-shape, dark blue with thick bloom; flesh greenish yellow, juicy, fine-grained, tender, firm, sweet, pleasant; quality good to very good; stone free; midseason. This is one of the outstanding new varieties.

2-year, 9/16-in. trees: Each, 75c; 3 for \$2.15; 6 for \$3.95; 10 for \$6.00; 25 for \$13.75; 50 for \$25.00; 100 for \$48.00.  
3-year-old trees: Each, \$1.10; 3 for \$3.00.

### BARTLETT

The most popular Pear for home use and market, a leader among canning Pears. Should be in every garden and orchard. Large, golden yellow with reddish blush on the sunny side. Flesh tender, melting and juicy, with a delicious, musky flavor. Tree vigorous, erect, bears abundantly.

2-year, 9/16-in. trees: Each, 75c; 3 for \$2.15; 6 for \$3.95; 10 for \$6.00; 25 for \$13.75; 50 for \$25.00; 100 for \$48.00.  
3-year-old trees: Each, \$1.10; 3 for \$3.00.

### SECKEL or SUGAR PEAR

The best pickling Pear. Fruit small, fine flavor and firm. Heavy cropper.

2-year, 9/16-in. trees: Each, 75c; 3 for \$2.15; 6 for \$3.95; 10 for \$6.00; 25 for \$13.75; 50 for \$25.00; 100 for \$48.00.  
3-year-old trees: Each, \$1.10; 3 for \$3.00.

### KIEFFER (Winter Keeper)

Large size, handsome appearance and remarkable keeping and shipping qualities. October-November.

2-year, 9/16-in. trees: Each, 75c; 3 for \$2.15; 6 for \$3.95; 10 for \$6.00; 25 for \$13.75; 50 for \$25.00; 100 for \$48.00.  
3-year-old trees: Each, \$1.10; 3 for \$3.00.

# Stromer's Profitable APPLE TREES

## New and Old—32 Varieties

### New ANOKA

Ripens in September. The size, color and flavor of the New Anoka make it a favorite. Also a good keeper. The remarkable feature of this excellent Apple is that it comes into bearing very young, is also dwarf in stature, so that it is well adapted to back-yard planting or closer in the orchard. A very good cooking Apple.

### New CORTLAND

The young bearing habit of this fine new fall Apple has astonished growers everywhere. It has proven to be one of the greatest eating, shipping, and market Apples ever introduced. The trees are large, healthy, and immensely productive. Fruit large and handsome. Flesh fine grained, crisp, and juicy.

### DOUBLE RED DELICIOUS

This variety is like Delicious in every respect excepting that it has added color. As the name implies this is a solid red, highly colored Delicious. It is recommended especially for locations where Delicious does not have sufficient color. The tree is hardy, healthy, vigorous and bears regular annual crops. Flesh is fine grained, crisp, melting and juicy. Quality is very good and the season is November to March. Delicious is a wonderful eating Apple.

### New HARALSON (For Cold Country)

This new variety stands in a class by itself on account of its hardness. It is the coming Apple for the cold Northwest. Comes into bearing very early in life, and is a vigorous grower. Fruit is good size, red and long keeping. Very good eating Apple. If you are looking for an Apple that will bear where it gets 40 degrees below zero, order Haralson.

### JONATHAN

The color of the fruit is bright red, the flesh is white, firm, crisp, tender and juicy. It is a very beautiful Apple, and one of the very best eating Apples. Not such a good cooker. It is one of the most desirable varieties for the holiday season. Good keeper. Trees are hardy and bear very young.

### McINTOSH

Medium in size. Fruit is beautiful red, somewhat striped. Flesh is white, crisp, and highly flavored. The tree is hardy and vigorous, and starts to bear young, and heavily. It is a favorite market and eating Apple. Ripens in September and October. Not a keeper.

### NORTHERN SPY (Farley No. 9)

A strong, vigorous tree, early bearing, heavy annual production, large size in fruit and an attractive typical striped color type. This parent tree produced a full crop of nearly 12 bushels when only 9 years old and a total of 141 bushels by the end of the sixteenth season. The fact that this tree produced 12 bushels when only 9 years old, shows that it must have come into bearing at not more than 6 years after planting. The fruit is large and extremely attractive. Color, bright red with indistinct stripings. Flesh, very juicy, crisp and tender and most excellent for either dessert or culinary uses. Season, November to March.

### ROME BEAUTY

Beautiful dark red apple of large size and handsome shape. Retains its rich color and juiciness in storage until spring. Popular for dessert purposes, cooking and drying. One of the best.

### SNOW (Fameuse)

Well known early winter Apple. Snow-white flesh, from which it takes its name. Medium size. Deep crimson in color. Juicy and very pleasant to eat out of hand. Fills in the gap between early fall Apples and late winter Apples. Tree very hardy and productive. November to December.

### STAYMAN'S WINESAP

Succeeds everywhere. Fruit is dark red, tinged yellow, of rich, enticing flavor. A fine eating Apple and sells readily on the market.

### TURLEY (Turley Winesap) (Coffing Bros.)

The Turley is gradually winning its way solely on its merits. The variety originated in Indiana and is much esteemed by the growers of that state as a commercial Apple. The tree is vigorous and bears fruit early, in 5 or 6 years from date of planting. The fruit is very red and inclined to be large. Season just before Stayman's Winesap.

### WEALTHY

Fruit is large size, round, smooth, and dark red. The flesh is white, tender, and juicy. This is the finest variety of its season. It ripens in September and will keep well into the late fall. A very good commercial variety.

### YELLOW TRANSPARENT

The very finest extra early Apple. It ripens late in July and continues in season until September. Fruit of good size, waxy yellow color. Flesh white, mild, juicy, and sweet.

## New! APPLES

**MELBA.** A McIntosh seedling from Canada. Color bright crimson over pale yellow. Season ahead of Early McIntosh and variety is adapted for home market as well as home use. Fine eating apple.

**KENDALL.** A cross between McIntosh and Zusoff. Fruit is of a solid dark red. Ripens with McIntosh but a little better keeper.

**NEW FANE.** Resembles a red colored sport of Delicious. Ripens with Delicious but keeps much longer.

**MILTON.** A cross between the McIntosh and Yellow Transparent, and ripens with the Wealthy. Tree is hardy and vigorous. Fruit pinkish red, with white flesh and the McIntosh flavor and aroma.

**McINTOSH EARLY.** Ripens 6 weeks ahead of McIntosh, and two weeks later than Yellow Transparent. Handsome red color and pleasing taste.

**SHARON.** A new Iowa introduction of good quality and is extremely hardy. Excellent for home planting. Color is red and green striped. Very good keeper. This is also a McIntosh cross.

**BLACKJON.** This is the best of all the red and early coloring Jonathan strains.

## FRENCH NAMED LILACS

We list five of the very best varieties and shades of the French lilacs. They are used as specimens, ornamental clumps, or where space is adequate for screens. All five of these imported varieties are thoroughly tested for hardiness and ease of growing. 1 1/2- to 2-ft. plants with good roots.

**VULCAN.** Large flowers of ruby red. Very outstanding. Fragrant.

**MARIE LEGRAYE.** Single white. Panicles large. One of the best whites. Fragrant.

**CONGO.** Large single flowers. Dark purple. Very fine.

**LUDWIG SPAETH.** Long panicles, large individual flowers. Dark purplish red. Very fragrant.

**PRESIDENT GREVY.** (Not illustrated.) This is a very fine double flowering variety of rosy mauve color. When wide open they turn bright blue.

1 1/2- to 2-ft. plants, strong, field-grown, each 50c; 3 for \$1.35; 5 for \$2.00; 10 for \$3.50, not postpaid. One of each variety, \$2.00, not postpaid.

SOUTH MICHIGAN NURSERY, New Buffalo, Mich.

# Flowering Shrubs

## ALTHEA (Rose of Sharon)

Strong, erect-growing shrubs of easiest culture, perfectly hardy and a prolific bloomer. Large showy flowers in late summer when few shrubs are in bloom.

|                        |        |        |        |
|------------------------|--------|--------|--------|
|                        | Each   | 3      | 10     |
| 2-yr., 2 to 3 ft. .... | \$0.20 | \$0.55 | \$1.50 |

## CALYCANTHUS

The sweet-scented shrub or strawberry shrub; also called chocolate shrub and Carolina allspice. Flowers very double, a brownish purple in color, and deliciously fragrant. Blooms nearly all summer, and is one of the most desirable shrubs; even the roots are very fragrant. Attains a height of 8 to 10 feet.

|                       |        |        |  |
|-----------------------|--------|--------|--|
|                       | Each   | 3      |  |
| 2-yr., 18-24 in. .... | \$0.35 | \$1.00 |  |

## COMMON SNOWBERRY

A well known shrub with small pink flowers and large white berries that will remain on the plant through part of the winter. The white berries are the most attractive characteristic of this shrub.

|                       |        |        |        |
|-----------------------|--------|--------|--------|
|                       | Each   | 3      | 10     |
| 2-yr., 18-24 in. .... | \$0.20 | \$0.55 | \$1.50 |

## FLOWERING ALMOND

Pink. Small shrubs, upright branches covered with double pink flowers in May. Blooms before leaves come.

|                       |        |        |        |
|-----------------------|--------|--------|--------|
|                       | Each   | 3      | 10     |
| 2-yr., 18-24 in. .... | \$0.45 | \$1.20 | \$3.50 |

## FORSYTHIA (Golden Bell)

What a bright spot this shrub makes in the landscape early in the spring! It is the first to bloom and lights up the whole yard with its masses of bright yellow flowers. Grows 6 to 8 ft. tall.

|                       |        |        |        |
|-----------------------|--------|--------|--------|
|                       | Each   | 3      | 10     |
| 2-yr., 18-24 in. .... | \$0.20 | \$0.55 | \$1.50 |

## HYDRANGEA P. G.

Flowers extra large, white turning to pinkish purple. Makes fine winter bouquets. Blooms July to October.

|                       |        |        |        |
|-----------------------|--------|--------|--------|
|                       | Each   | 3      | 10     |
| 2-yr., 18-24 in. .... | \$0.30 | \$0.85 | \$2.50 |

## HYDRANGEA A. G.

(Hills of Snow). Resembles the old-fashioned Snowball bush. Large blooms open in June and last all summer.

|                       |        |        |        |
|-----------------------|--------|--------|--------|
|                       | Each   | 3      | 10     |
| 2-yr., 18-24 in. .... | \$0.30 | \$0.85 | \$2.50 |

## HONEYSUCKLE, TARTARIAN

One of the very best tall growing shrubs. In May and June it is covered with pink flowers, followed by many clusters of red and orange berries. Hardy everywhere and grows in sun or shade. As it makes a shrub 8 to 12-ft. tall, it is exceptionally fine for screen, hedge or background.

|                       |        |        |        |
|-----------------------|--------|--------|--------|
|                       | Each   | 3      | 10     |
| 2-yr., 18-24 in. .... | \$0.20 | \$0.55 | \$1.50 |

## JAPONICA (Flowering Quince)

Very early in spring this fine old shrub is completely covered with dazzling scarlet flowers. The leaves are deep green and glossy, the growth bushy. The quince-shaped fruits are quite fragrant.

|                    |        |        |  |
|--------------------|--------|--------|--|
|                    | Each   | 3      |  |
| 2-yr. 2-3 ft. .... | \$0.35 | \$1.00 |  |

## KOLKWTZIA

Beauty Bush. In early June it is a mass of arching sprays of pale pink, tubular flowers which are somewhat deeper in the bud. The individual blossoms are almost an inch long and 3/4-inch in diameter. Reaches a height of 6 to 7 feet.

|                       |        |        |        |
|-----------------------|--------|--------|--------|
|                       | Each   | 3      | 10     |
| 2-yr., 18-24 in. .... | \$0.45 | \$1.20 | \$3.50 |

## MAGNOLIA (M. Soulangeana)

A handsome tree of dense growth. Large cup-shaped flowers of deep rose-pink shading to silvery pink. Flowers appear before the foliage and when in bloom the tree is literally covered with these handsome tulip-like flowers.

|                                     |        |  |  |
|-------------------------------------|--------|--|--|
|                                     | Each   |  |  |
| 2- to 3-ft. trees full of buds .... | \$3.00 |  |  |

## PERSIAN LILAC

A decided improvement over the common Lilac. Does not sprout so much from the roots. Height 5 to 10 feet. Flowers bright purple. Blooms in May and June.

|                       |        |        |        |
|-----------------------|--------|--------|--------|
|                       | Each   | 3      | 10     |
| 2-yr., 18-24 in. .... | \$0.25 | \$0.65 | \$2.00 |

Lack of space prohibits us from using illustrations or featuring any of our shrubs.

We offer you our list of fine old and new varieties as follows:

## RUSSIAN OLIVE

Rugged, tree-like shrub, growing 10 to 12 feet high. Foliage is a beautiful, silvery gray, contrasting sharply with other shrubs. Flowers are deep golden and very fragrant, followed by ornamental yellowish brown fruits with silver scales.

|                       |        |        |        |
|-----------------------|--------|--------|--------|
|                       | Each   | 3      | 10     |
| 2-yr., 18-24 in. .... | \$0.25 | \$0.70 | \$2.10 |

## SYRINGA, VIRGINAL

This is the best Mock Orange. The flowers are very large, pure white, and so fragrant that just a spray will perfume an entire room. Blooms very profusely in June, with scattering flowers through the summer. It is unquestionably one of the very finest white flowering shrubs. Grows everywhere and makes a bush 5 to 6 feet tall.

|                       |        |        |        |
|-----------------------|--------|--------|--------|
|                       | Each   | 3      | 10     |
| 2-yr., 18-24 in. .... | \$0.35 | \$1.00 | \$2.50 |

## SPIREA VAN HOUTTEI

Sometimes called Bridal Wreath. Branches droop to the ground with small white flowers early in the spring. Foliage makes it beautiful all summer.

|        |           |         |        |
|--------|-----------|---------|--------|
|        | 18-24 in. | 2-yr.   |        |
| Each   | \$0.14    | 25 for  | \$2.25 |
| 3 for  | .40       | 50 for  | 4.30   |
| 6 for  | .65       | 100 for | 7.95   |
| 12 for | 1.15      |         |        |

|        |            |         |        |
|--------|------------|---------|--------|
|        | 2 to 3 ft. | 2-yr.   |        |
| Each   | \$0.20     | 25 for  | \$3.95 |
| 3 for  | .55        | 50 for  | 5.50   |
| 6 for  | 1.00       | 100 for | 10.00  |
| 12 for | 1.80       |         |        |

|       |            |        |        |
|-------|------------|--------|--------|
|       | 3 to 4 ft. | 3-yr.  |        |
| Each  | \$0.35     | 6 for  | \$1.75 |
| 3 for | 1.00       | 12 for | 2.95   |

|       |            |              |        |
|-------|------------|--------------|--------|
|       | 4 to 5 ft. | husky, 3-yr. |        |
| Each  | \$0.45     | 6 for        | \$2.00 |
| 3 for | 1.20       | 12 for       | 3.25   |

## SPIREA BILLIARDI

A grand shrub for group and foundation planting. Long spikes of deep rose-colored flowers from June to September. Grows 4 to 5 feet tall.

|                       |        |        |        |
|-----------------------|--------|--------|--------|
|                       | Each   | 3      | 10     |
| 2-yr., 18-24 in. .... | \$0.20 | \$0.50 | \$1.55 |

## SPIREA ANTHONY WATERER

Beautiful dark small foliage; dense rounded growth; and large, brilliant rosy crimson corymbs, at its best in midsummer. More of this variety is used for foundation plantings and low borders, than any other dwarf shrubs. Plant 2 feet apart.

|                     |        |        |        |
|---------------------|--------|--------|--------|
|                     | Each   | 3      | 10     |
| 2-yr., field-grown. |        |        |        |
| 12-15 in. ....      | \$0.20 | \$0.50 | \$1.55 |

## SNOWBALL

Grand old shrub of our grandmother's garden. In early spring is covered with hundreds of pure snow-white balls. Tall shrub, growing in sun or partial shade.

|                       |        |        |  |
|-----------------------|--------|--------|--|
|                       | Each   | 3      |  |
| 2-yr., 18-24 in. .... | \$0.35 | \$1.00 |  |

## TAMARIX AFRICANA

Tall shrub, 8 to 10 feet high, with fine feathery foliage and small, bright pink flowers, in slender racemes in April and May.

|                       |        |        |        |
|-----------------------|--------|--------|--------|
|                       | Each   | 3      | 10     |
| 2-yr., 18-24 in. .... | \$0.20 | \$0.55 | \$1.50 |

## VIBURNUM CARLESI

Pink Snowball. Wonderful new shrub. Its fragrance resembles trailing arbutus. Will bloom early in spring; thrives best in partial shade and cool moist soil.

|                       |        |        |  |
|-----------------------|--------|--------|--|
|                       | Each   | 3      |  |
| 2-yr., 18-24 in. .... | \$0.65 | \$1.75 |  |

## WEIGELA ROSEA

Showy, trumpet-shaped flowers of rose-pink cover this broad bushy shrub from May to July. It grows 5 to 6 ft. tall and is one of the good shrubs. Lovely flowers and attractive foliage. Easy to grow.

|                       |        |        |        |
|-----------------------|--------|--------|--------|
|                       | Each   | 3      | 10     |
| 2-yr., 18-24 in. .... | \$0.25 | \$0.70 | \$2.00 |

## WITCH HAZEL

Valuable because its fringe-like yellow flowers open in November. Grows 10 to 15 feet tall, with fine leaves that color to yellow, orange or purple in fall and drop before the bright yellow flowers appear. Moist sandy or peaty soil and partial shade.

|                |        |        |  |
|----------------|--------|--------|--|
|                | Each   | 3      |  |
| 18-24 in. .... | \$0.45 | \$1.10 |  |

## ORNAMENTAL AND SHADE TREES

### BUDDLEIA, ILE DE FRANCE

Of quick bushy growth; when the lovely bloom-spikes appear in July, the shrub, which had probably died down nearly to the ground during winter, is now a perfect, well-branched specimen of about 5 feet; radiating a delightful perfume and glowing with tints and shape of the spring Lilacs. A new variety, of more uniform moderate growth, and greater brilliance of color in the bloom. Thick flower spikes 6 to 9 inches long, sweetly fragrant; rosy purple with a deep violet suffusion.

|            |        |        |  |
|------------|--------|--------|--|
|            | Each   | 4      |  |
| 2-yr. .... | \$0.30 | \$1.00 |  |

### CUT-LEAF WEEPING BIRCH

A graceful white-barked tree with drooping limbs, and cut-leaf foliage.

|                 |        |        |  |
|-----------------|--------|--------|--|
|                 | Each   | 2      |  |
| 5 to 6 ft. .... | \$1.50 | \$2.75 |  |

### EUROPEAN MOUNTAIN ASH

Hardy, erect, 20 to 30 feet high, with smooth bark and dense regular heads; berry clusters large and bright.

|                 |        |        |        |
|-----------------|--------|--------|--------|
|                 | Each   | 2      | 5      |
| 4 to 5 ft. .... | \$1.00 | \$1.85 | \$3.95 |

### NORWAY MAPLE

A handsome tree of large, fairly rapid growth forming a dense, rounded head of strong branches and broad, deep green leaves, sturdy, compact, vigorous; it is one of the very best formal trees.

|                 |        |        |  |
|-----------------|--------|--------|--|
|                 | Each   | 2      |  |
| 5 to 6 ft. .... | \$1.10 | \$2.00 |  |

### SILVER MAPLE

Rapid growing, producing quick shade. Leaves indented, bright green above, silver beneath.

|                 |        |        |        |
|-----------------|--------|--------|--------|
|                 | Each   | 3      | 10     |
| 5 to 6 ft. .... | \$0.40 | \$1.20 | \$3.50 |

### BOLLEANA POPLAR

Similar to the well-known Lombardy Poplar in habit, but broader, and like it, useful in breaking the monotony of lower round-topped trees. Will grow to a tall spire, 80 feet high. Its leaves are glossy green above, silvery beneath.

|                 |        |        |        |
|-----------------|--------|--------|--------|
|                 | Each   | 2      | 5      |
| 5 to 6 ft. .... | \$0.90 | \$1.75 | \$3.50 |

### LOMBARDY POPLAR

Attains a height of from 50 to 60 feet. Well known and remarkable for its erect, rapid growth, and tall, spire form. Indispensable in landscape gardening, to break the monotonous outline of other trees.

|                   |        |        |        |
|-------------------|--------|--------|--------|
|                   | Each   | 3      | 10     |
| 2 to 3 ft. ....   | \$0.25 | \$0.60 | \$1.50 |
| 4 to 5 ft. ....   | .35    | 1.00   | 2.00   |
| 10 to 12 ft. .... | 1.10   | 2.00   | 6.00   |

### FRENCH PUSSY WILLOW

(Salix discolor). A small tree with attractive leaves 2 inches long by an inch wide. Its popular appeal is the conspicuous silky catkins which make such delightful "springy" bouquets just as the snow is melting.

|                        |        |        |  |
|------------------------|--------|--------|--|
|                        | Each   | 3      |  |
| 3-yr., 5 to 6 ft. .... | \$0.35 | \$1.00 |  |

### NIOBE WEEPING WILLOW

(YELLOW BARK)

A large tree with long, drooping branches. Very hardy. Fine for parks, rock gardens or along streams.

|                 |        |        |        |
|-----------------|--------|--------|--------|
|                 | Each   | 3      | 10     |
| 5 to 6 ft. .... | \$0.75 | \$1.40 | \$6.00 |

### WISCONSIN WEEPING

WILLOW (GREEN BARK)

Immense, graceful, broad-topped tree. Its fresh, bright green tint, and long, wavy branches make it very attractive. The most generally planted variety. Grows rapidly.

|                   |        |        |        |        |
|-------------------|--------|--------|--------|--------|
|                   | Each   | 2      | 3      | 10     |
| 4 to 5 ft. ....   | \$0.35 | \$0.55 | \$1.00 | \$2.50 |
| 10 to 12 ft. .... | \$1.00 | \$1.75 | \$2.25 |        |

Chinese Elm Six Years Old

CHINESE ELM Shade Tree

One of the most rapid growing trees. Very durable and hardy. Slender, tough branches. Compact habit of growth with small attractive leaves. Highly recommended for street planting. Grows anywhere, and is one of the best for dry climates.

| 12 to 18 in. seedlings   |        |         |        |
|--------------------------|--------|---------|--------|
| Each                     | \$0.07 | 25 for  | \$1.00 |
| 5 for                    | .25    | 50 for  | 1.85   |

| Each                     | \$0.55 | 10 for  | \$4.60 |
| 5 for                    | 2.50   |         |        |
| 8 to 10 ft.              |        |         |        |
| Each                     | \$1.40 | 5 for   | \$5.95 |

CORNUS FLORIDA RUBRA

(Red-flowering dogwood.) Slower growing and more formally shaped, with handsome rose-red flowers. An attractive lawn specimen or group subject. As we grow them, these small trees are among the most popular of all the "fancy" types for group association with such kinds as the cherries, crabs, and thorns.

| PRICE:     | Each   |
|------------|--------|
| 3 to 4 ft. | \$1.75 |

PAUL'S SCARLET HAWTHORN

Sometimes called Tree of Fire. This tree is hardy and low growing. In May and June, it will be covered with double scarlet flowers, followed with beautiful red berries. Foliage is rich glossy green all summer; colors up in the fall.

| PRICE:     | Each   |
|------------|--------|
| 3 to 4 ft. | \$1.25 |

REDBUD (Judas Tree)

Spring's early harbinger, blooming in April, and literally covered with red or pink blooms before the leaves appear. A small tree, with large, deep green leaves. Each 3 10 3 to 4 ft. \$0.50 \$1.40 \$3.95

AMERICAN FILBERT (Hazelnut)

This is the family favorite. This nut does not grow into a tree, rather a bush, and bears tasty round nuts. Bushes grow fast and bear young, yielding abundant crops year after year. Bushes very hardy.

| PRICE:     | Each   |
|------------|--------|
| 3 to 4 ft. | \$1.00 |

CRANBERRY, HIGH BUSH

Handsome shrub with flat clusters of white flowers in April-May followed by scarlet berries which hang on all winter. Grows tall, in either sun or partial shade.

| PRICES:          | Each   | 3      | 10     |
|------------------|--------|--------|--------|
| 2-yr., 18-24 in. | \$0.40 | \$1.10 | \$3.00 |

LILY-OF-THE-VALLEY

Just the thing to put into that cold, shaded strip along the walk on the east or north side of your house. The loose panicles of tiny bell-shaped flowers set low in their emerald foliage, and are not conspicuous; but they do cover the waste ground, furnish a vast amount of cut sprays, and sweetly perfume the entire yard.

| PRICES:               | 10     | 25     | 100    |
|-----------------------|--------|--------|--------|
| Strong pips, postpaid | \$0.50 | \$1.00 | \$3.00 |

LUPINES

Unusually beautiful perennial. Striking pea-shaped flowers are borne on 3- to 4-ft. spikes. Bloom in June and July. Must have plenty of moisture. Come in assorted colors, red, yellow, pink, and blue. State color wanted.

| PRICES:                      | Each   | 5      | 10     |
|------------------------------|--------|--------|--------|
| Strong plants, postpaid      | \$0.20 | \$0.75 | \$1.25 |
| Four, one of each color, for | 65c.   |        |        |

HARDY HEDGES AMOOR RIVER NORTH PRIVET

This is the hardiest of all hedges, and one of the most beautiful. Foliage dark glossy green. Leaves stay on long into the winter. Fine white flowers with berries later on. Set 1 foot apart.

| PRICES:            | Each   | 10     | 50     | 100    |
|--------------------|--------|--------|--------|--------|
| 12-18-in., strang. | \$0.10 | \$0.75 | \$3.00 | \$5.25 |
| 18-24 in., husky   | .12    | 1.00   | 3.75   | 7.00   |
| 2-3 ft. specimens  | .20    | 1.50   | 5.50   | 10.50  |

CHINESE ELM Hedge

The very finest of all hardy hedges, stands 40 degrees below zero, does equally well on very low or very dry soil, can be trimmed or left natural for windbreak.

| 12 to 18 in. seedlings |        |         |        |
|------------------------|--------|---------|--------|
| Each                   | \$0.07 | 25 for  | \$1.00 |
| 5 for                  | \$0.25 | 50 for  | \$1.85 |
| 10 for                 | \$0.45 | 100 for | 3.50   |

BARBERRY, Thunberg's Green

Perfectly hardy. Rust-proof. Bright green foliage turning to a dazzling red in autumn, followed by red berries. Very beautiful. Grows in all soils. May be pruned, or makes a beautiful hedge not trimmed. Also fine for specimen bushes or borders.

| Transplants      |        |        |               |
|------------------|--------|--------|---------------|
| PRICES:          | Each   | 10     | 25            |
| 2-yr., 15-18 in. | \$0.15 | \$0.60 | \$1.00 \$1.75 |

RED BARBERRY

Makes a beautiful specimen bush as well as hedge plant. Foliage purple to a bright red. Produces a brilliant appearance in any landscape.

| PRICES:   | Each   | 3      | 10     |
|-----------|--------|--------|--------|
| 12-18 in. | \$0.30 | \$0.75 | \$2.40 |

GIANT DAHLIAS DAKOTA

10 to 12 inches. Looks like a huge flaming torch, petals being streaked with red and orange. A very prolific bloomer. Rank grower. Does well in shade or sun. Each, 25c, postpaid.

MRS. I. DE VER WARNER

A great gorgeous six-inch fluff, soft wisteria streaked violet. Each, 25c, postpaid.

LAURA MORRIS

7 inches. Clear, pure, beautiful yellow that dances and shimmers in fascinating fashion. Each, 25c, postpaid.

JERSEY'S BEAUTY

A great fluffy ball of beauty—soft yellow under-tint, beautifully streaked with rosy shades of mauve. Each, 25c, postpaid.

|                             |                   |
|-----------------------------|-------------------|
| 4 bulbs, 1 of each variety, | 80c, postpaid.    |
| 8 bulbs, 2 of each variety, | \$1.50, postpaid. |

MIXED DAHLIAS

Each season at planting time we reserve a limited number of tubers of each variety for filling late orders. Of course we never sell out slick and clean, so the tubers that are left are all mixed up and planted. So we offer you bulbs from this well-balanced mixture at a real bargain price. 10 fresh-dug bulbs put up in a neat corrugated box with cultural directions and postpaid for only \$1.00. 2 boxes for \$1.80. 5 boxes for \$4.00.

SILVER LACE VINE

From the middle of summer until late fall, it is completely covered with snowy white flowers. The glossy green foliage is also attractive. Unsurpassed for porch and arbor. Will give flowers and shade the very first season, as it generally grows 15 to 20 feet the first year. Planted the country over. We have reduced the prices on our strong, three-year, field-grown plants.

| PRICES:            | Each   | 3      |
|--------------------|--------|--------|
| Strong 3-yr plants | \$0.55 | \$1.50 |

GIANT PURPLE WISTERIA

The most magnificent of all vines. Lilac-purple flowers in long clusters in June and July. Our plants are grown from blooming wood so you will get the true flowering type that will bloom the next year after planting.

| PRICES:              | Each   | 3      |
|----------------------|--------|--------|
| 2-yr., strong plants | \$0.35 | \$1.00 |

BOSTON IVY

(Japanese Creeper; Amp. Veitchi). Clings to the smoothest surface without support, completely covering it with overlapping leaves. Foliage turns crimson in the fall. Prefers partial shade.

| PRICES:              | Each   | 3      |
|----------------------|--------|--------|
| 2-yr., strong plants | \$0.35 | \$1.00 |

TRUE BITTERSWEET

Produces bright orange-red berries that are so popular for winter bouquets. Grows in sun or partial shade. Plant 2 or 3 vines so they can cross-pollinize, giving lots more berries.

| PRICES:              | Each   | 3      |
|----------------------|--------|--------|
| 2-yr., strong plants | \$0.35 | \$1.00 |

CLEMATIS JACKMANI

A gorgeous vine that produces its immense royal purple flowers. (4 to 6 inches across) nearly all summer. You have always wanted one of these beautiful vines.

| PRICES:              | Each   | 3      |
|----------------------|--------|--------|
| 2-yr., strong plants | \$0.60 | \$1.70 |

HALL'S JAPAN HONEYSUCKLE

Its fragrant white and yellow flowers are produced freely almost all summer and the leaves remain green almost all winter. Grows vigorously in sun or partial shade. Fine for porch, fence, and covering cove or bank.

| PRICES:              | Each   | 3      |
|----------------------|--------|--------|
| 2-yr., strong plants | \$0.25 | \$0.65 |

HONEYSUCKLE "Gold Flame"

Immense, showy clusters of trumpet-shaped buds and fragrant blooms. Outside of petals brilliant flame-pink, while the inside is a creamy golden yellow. Dark glossy foliage. Blooms freely from early spring until cut down by heavy frost.

| PRICE:   | Each   |
|----------|--------|
| Postpaid | \$0.75 |

CANNAS

Cannas have come into their own the past few years and no garden is complete without them. Our Cannas are strong field grown roots. Here are the varieties.

- Eureka. Best white. 4 ft. tall, green leaves.
- City of Portland. 3½ ft. Glowing pink. Green leaves.
- The President. Glowing red. 6-ft. Green leaves.
- Apricot. Brilliant yellow. Green leaves, 4 ft
- Wyoming. Orange color. Bronze leaves, 5 ft.

| PRICES:                                         | Each   | 5      | 10     |

Roses for only \$2.40, postpaid.  
NO DISCOUNT.

## THE DARKEST OF THE RED ROSES

Ami Quinard has won several awards as a superb novelty rose. The blackish buds open to semi-double flowers of velvety maroon getting darker with age. Fine rose fragrance. Strong upright branches; very hardy and vigorous blooming.

**AMI QUINARD.** Blackish crimson buds borne on stiff, erect stems. Vigorous habit. Darkest of all red roses.

**AUTUMN.** Buds of burnt orange, opening to double buds of bright yellow streaked with red.

**EDITH NELLIE PERKINS.** Sweetly scented, long-pointed buds. Inner petals salmon-pink; outer petals orange suffused with red. Very fragrant and long lasting.

**EDITOR McFARLAND.** This is one of the newest large pink roses introduced. Exceptionally fine sparkling bright pure pink. Free blooming and vigorous.

**E. G. HILL.** Bright scarlet flowers on long stems. Double, with long buds. Fine foliage of excellent texture. One of the best reds.

**JULIEN POTIN.** (Golden Pernet.) A magnificent one-shade yellow—deep golden yellow, growing richer in tone with maturity.

**K. A. VICTORIA.** Snowy white with faint yellow about base of buds. Vigorous grower. A garden favorite where white roses are wanted.

**MARGARET McGREDY.** Rich oriental red passing to carmine-rose, lasting a long time. Large, free, with spicy fragrance.

**TALISMAN.** The most vividly colored rose ever introduced and unusually easy to grow. Its foliage is very fine and vigorous, untroubled by disease, and is a free blooming, rapid grower. In intensity and vividness of color, no rose approaches it. The base of the petals are golden yellow shading to coral and bright red at the tips. Has been awarded four gold medals.

**CLIMBING AMERICAN BEAUTY.** Bulky, double, solitary flowers, extremely profuse, bright rose-red. Strong, quick-growing, healthy.

**PAUL'S SCARLET CLIMBER.** This new hardy climber was originated in England. It is not a rambler, but is an entirely distinct hybrid and without question the most important addition to the list of climbing roses in many years. Incomparable in brilliancy of color, which is a vivid scarlet maintained without burning or bleaching until the petals drop. Flowers are medium size, semi-double; very freely produced in clusters of from three to six each on large branched canes, the plants being literally covered with flowers from top to bottom. It is strong, perfectly hardy, and has been awarded the gold medal by the National Rose Society of England.

**DR. W. VAN FLEET (CLIMBER.)** This rose, because of its dainty color and exquisitely shaped buds and flowers, appeals to all. The long-pointed buds are of flesh-pink borne on stems 12 to 18 inches long. Splendid for cutting.

### EVERBLOOMING BUSH ROSE PRICES

These are fine, strong, 2-year, field-grown plants.

## STROMER'S CASCADE MOUNTAIN ROSES

Our roses are not grown in southern states, nor are they grown in Michigan. They are grown way up in the foot hills of the Cascade mountains in the extreme northwest tip of the United States on the border line of the state of Washington and Canada. The deep lava drenched soil here is perfect for growing roses. The climate is just right, and they ripen up in plenty of time to become dormant before winter. No other place in America does such a perfect condition exist. Our roses will reach you in perfect growing condition. Our plants will be shipped to you from New Buffalo, Michigan. If our prices seem a little higher, remember we cannot compete with the cheaper southern grown roses. Our roses are grown 2 years in this nature's rose Eden, before we ship them to you at reasonable prices. In roses you get what you pay for. Think it over and give our roses a trial this spring.

## PEONIES

### 4 New Aristocrats

#### NEW PEONIES

The figures following descriptions are ratings given by the American Peony Society based upon vigor, size of bloom, etc.

Each year more and more Peonies are being planted in the spring. Peonies are easy to grow, especially from our fine large 3- to 5-eye root divisions. Dig a hole plenty large enough, and set the root so that the eyes will be not deeper than 2 in. below the level of the ground. Our roots planted in April and May will bloom this year. As soon as the eyes appear above the ground, start to cultivate them, and keep them cultivated till August 1st.

**KARL ROSENFELD.** 8.8. Very tall. Rich dark velvety crimson, clear and brilliant, without a trace of purple. Midseason. No other crimson can equal it. **Price: Each, 45c; 3 for \$1.25; 10 for \$3.50. Postpaid.**

**MONS. JULES ELIE.** 9.2. Tall grower. Immense globular flowers, glossy lilac-pink shading to deeper rose, the entire flower being overlaid with a sheen of silver. The flowers grow to be over 9 in. across, and appear like a giant chrysanthemum. Early to midseason. **Price: Each, 55c; 3 for \$1.45; 10 for \$4.25, postpaid.**

**SARAH BERNHARDT.** 9.0. Tall grower. Apple-blossom-pink with each petal tipped with silver, making it an almost perfect peony. Very fragrant. Midseason to late. **Each, 60c; 3 for \$1.70; 10 for \$5.00, postpaid.**

**LE CYGNE.** 9.9 This ranks as the world's most perfect peony. Creamy white with no tracings of color. The grandest white flower you ever beheld, foliage of the darkest green. This giant compact bloom has the fragrance of a June rose. Early midseason. **Price: Each, \$1.60, postpaid.**

## Four Old Favorites

### More common but very good varieties

**FESTIVA MAXIMA.** 9.3. Very large globular rose type. Broad petals, pure white center usually flecked crimson. Outer petals sometimes pale lilac-white on first opening. Very tall, vigorous. Early bloomer. Most popular white cut flower. Lasting. Fragrant. **Price: Each, 35c; 3 for \$1.00; 10 for \$2.95. Postpaid.**

**LORD KITCHENER.** 7.6. Flowers of brilliant cherry-red. Free bloomer. Lasts long. Very early. Blooms Decoration Day. **Price: Each, 35c; 3 for \$1.00; 10 for \$2.95, postpaid.**

**EDULIS SUPERBA.** 7.6. Deep rose-pink with an occasional marking. Very fragrant early bloomer. Another Decoration Day bloomer. **Price: Each, 35c; 3 for \$1.00; 10 for \$2.95, postpaid.**

**DUC DE WELLINGTON.** 7.8. Strong grower. Large flowers, guard petals white with centers sulphur-yellow. Fragrant. Late midseason. **Price: Each, 35c; 3 for \$1.00; 10 for \$2.95, postpaid.**

## IRIS

We have too many varieties of extra good German Iris to list them each separately, so we have made a real mixture of these 33 varieties. Colors range in reds, whites, blues, lavenders, pinks, yellows, bronze, and dozens of combination colors, like yellow-violet, rose-pink with light orange, etc. Many new and rare varieties in this mixture. **Price: 10 for 75c, 25 for \$1.50, 100 for \$5.00, postpaid.**

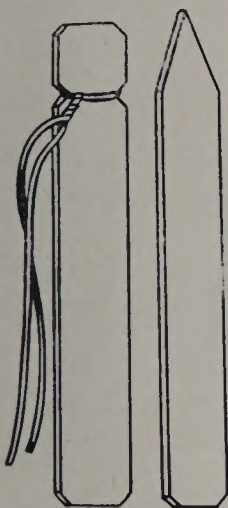

## SOUTH MICHIGAN NURSERY, New Buffalo, Mich.

### Saxolin Duplex Crinkled Waterproof Tree Wrap

#### Method of Application

By applying the Spiral Bandage from the topmost part of the trunk downward, it enables moisture from rains to enter the wrapped area. The moisture is retained by the Duplex Waterproof Kraft—a distinct advantage to the growing tree.

### BLANK WOOD Labels

Pointed pot labels or copper-wired tree or shrub labels, 3 1/2 inch.

100 for 50c  
1000, \$3.25

Postpaid

Very handy to have some on hand.

## PROTECT YOUR YOUNG FRUIT AND SHADE TREES from Sun-Scald, Mice, Rabbits, Borers and Many Injurious Insects

Girdling the trunks of transplanted and newly planted fruit and shade trees has been practiced by U. S. Agricultural Colleges—Soil Conservation Service—State and County Highway Commissions—State College Extension Service—Landscape Architects—Park Executives, and Foresters for a number of years.

The use of Crinkled Duplex Waterproof Kraft is advocated as a thoroughly tried and proved procedure of wrapping tree trunks to provide protection against sun-scald, borer attacks, and the ravages of rabbits and field mice.

It is an established fact that rodents will not molest anything containing asphaltum.

The successful planting of trees has been done on a larger scale in recent years than ever before, due to the scientific handling and proper preservation of their trunks.

Danger resulting from sun-scald to thin bark trees when transplanted is frequently serious if the trunks of the trees are not completely covered. The open wounds offer places for insects to deposit their eggs.

Waterproof Kraft Spiral Wrap not only provides protection against sun scald, but prevents adult boring insects from laying their eggs any place on the bark.

Provides security against frost and cold and protection against the ravages of rabbits and field mice.

Rolls are 4 in. wide, about 155 lineal ft. 8 in. diameter, and weighs about 2 1/2 pounds. Price per roll, 70c; 5 rolls, \$3.00; 12 rolls, \$6.00. One roll will do about 30 small trees.

## GORGEOUS LILIES

**GOLD BANDED LILY (Auratum).** Large, fragrant flowers. Delicate ivory color, with chocolate-crimson spots and golden band through center. July to September. Large size bulbs, 35c each; 3 for 95c; 6 for \$1.75, postpaid.

**PHILIPPINE LILY (Philippinense formosanum).** New! Long, trumpet-shaped flowers, white with reddish brown shading on exterior. Interior white with lovely green throat. Very fragrant. Blooms August to frost. Strong bulbs, 25c each; 3 for 70c; 6 for \$1.20, postpaid.

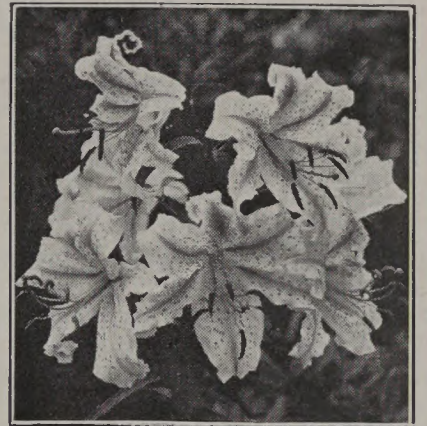

**REGAL LILY.** Tall spikes of white flowers, slightly suffused with pink, with a beautiful glow of canary-yellow at the center. Exquisite perfume. Starts blooming end of June. Large size bulbs that will bloom this summer, only 15c each; 3 for 40c; 6 for 70c; 12 for \$1.25, postpaid.

## SOILMASTER

Soilmaster is a decomposed, concentrated leaf-mold and decayed vegetation. This is the humus to use on lawns, around shrubs and in your garden. Holds seven times its weight in moisture, and is a good fertilizer. Rejuvenates gardens, lawns, shrubbery and trees; is a natural plant food, a natural soil builder; far superior to stable manure, has the same fertilizing value, is clean, odorless and does not burn; and can be applied any time and anywhere. Is ideal for the farm home, garden or suburban home. Requires less water after application than other fertilizer as it holds moisture for an indefinite period. Makes the soil mellow and prevents baking. Soilmaster goes farther, lasts longer and is more economical; two-bushel bag, which is approximately 100 pounds, is enough for 100 square feet of lawn or 8 good sized shrubs or ornamentals. You are assured of a three year's growth in two year's time by using this humus.

Note testimonials.

### SODUS ACID HUMUS

Sodus Humus will hold moisture and has the same fertilizer value as Soilmaster—the only difference between the two is that one is sour and the other is sweet. We recommend this Humus for Evergreens, Rhododendrons and Blueberries, or any shrub or ornamental that requires an acid soil.

### Price of Soilmaster and Sodus Acid Humus

Specify which you want when ordering.

2-bu. bag for \$1.00, net—not subject to any cash discount. We will ship by freight collect unless otherwise instructed. We do not sell less than a bag.

Gentlemen:

Kent, Ohio.

As a result of our many years spent in the care of thousands of fine trees, we know that lawn trees must be supplied with artificial food, more especially with humus.

After vigorous tests and use extending over a period of 4 years, we are glad to say that Soilmaster has proven itself to be an ideal form of humus. Results following its use have been uniformly satisfactory and at times quite amazing.

We therefore take pleasure in recommending the use of Soilmaster. Inasmuch as it is taken from the natural soil deposit, there seems to be no danger of overfeeding or burning in its generous use.

Sincerely yours,

The Davey Tree Expert Company,  
Signed, M. L. Davey, President.

### STANDARD OIL CO.

Soilmaster Company, Benton Harbor, Michigan,  
Berrien Springs, Mich. April 15.

Gentlemen: After using your material at four of our stations, where we usually have difficulty in securing a good lawn, we take pleasure in recommending Soilmaster for either sandy or clay soil. It not only holds the moisture but feeds the lawn throughout the season. Sincerely yours,

F. F. FOWLER, Agent, Benton Harbor.

## Grow Your Own EVERGREENS FOR PLEASURE AND PROFIT

**PFITZER JUNIPER.** One of the most important Evergreens of today. It is a Juniper that thrives under many conditions; it does well in open, sunny places as well as in shady or protected places. Forms a thick, bushy mass of silvery foliage. 3-yr., 6 to 8 in., twice transplanted, 25c each; 2 for 45c; 5 for \$1.00; 10 for \$1.75; 25 for \$3.75, postpaid.

**VIRGINIANA JUNIPER.** This native variety when trimmed makes a very attractive tree and thickens its foliage more by shearing. Can be made to grow in a pyramidal form. 2 to 4 in. seedlings, 15c each; 2 for 25c; 5 for 50c; 10 for 90c; 25 for \$2.00; 100 for \$7.50, postpaid.

**AUSTRIAN PINE.** A long-needle Pine of fast growth. A fine specimen tree or can be used in foundation if kept trimmed back. These trees thrive in any location. 4 to 6 in. seedlings, 15c each; 2 for 25c; 5 for 50c; 10 for 80c; 25 for \$1.75; 100 for \$6.50, postpaid.

**MUGHO PINE.** Dwarf Pine of low, thick, bunched habit. Dark green foliage throughout the season. Very hardy and holds its color well. Used extensively in rock gardens. 2-yr.-old, 6 to 8 in. spread, once transplanted, 20c each; 2 for 35c; 5 for 75c; 10 for \$1.35; 25 for \$3.00, postpaid.

**PYRAMIDAL ARBOR-VITAE.** This variety has dark green foliage. Very hardy. Grows thick and makes a pyramidal growth from the ground up. Does not get very broad at the base, but grows naturally in a columnar shape. 2-yr., once transplanted, 4 to 6 in., 25c each; 2 for 45c; 5 for \$1.00; 10 for \$1.80; 25 for \$3.75; 100 for \$14.00, postpaid.

Mugho Pine

**GLOBE ARBOR-VITAE.** Round, bushy, compact. Hardy. Dwarf. 2-yr., once transplanted, 4 to 6 in. spread, 25c each; 2 for 45c; 5 for \$1.00; 10 for \$1.80; 25 for \$3.75; 100 for \$14.00, postpaid.

**NORWAY SPRUCE.** Dark green foliage throughout the season, always holds its color well, grows well in most any location. Very hardy and easy to transplant. 4 to 6 in. seedlings, 10c each; 5 for 40c; 10 for 60c; 25 for \$1.25; 100 for \$3.50; 1000 for \$30.00, postpaid.

**COLORADO BLUE SPRUCE.** A very hardy evergreen. One of the most beautiful for landscape work. Foliage is greenish blue to silvery blue. Should be set in open sunlight, not too near other trees and buildings for best color. 2 to 4 in. seedlings, 15c each; 5 for 60c; 10 for \$1.00; 25 for \$2.00; 100 for \$7.50; 1000 for \$45.00, postpaid.

**CHINESE JUNIPER.** A native Juniper of Asia where it covers large areas. The needles are sharp and prickly, light green with a slightly bluish cast. It overgrows 15 to 20 feet. 6 to 8 in., each 20c; 2 for 35c; 5 for 75c; 10 for \$1.35, postpaid.

**CONCOLOR SILVER FIR.** This variety of Fir has silvery blue foliage, and is one of the cheeriest of all evergreens in the winter as well as in the summer. One of the best of evergreens to withstand severe drought, and cold winters. Grows like the Colorado Blue, but without the Spruce stiffness. 2-yr.-old, once transplanted, 15c each; 2 for 25c; 5 for 50c; 10 for 80c; 25 for \$1.75; 100 for \$6.50, postpaid.
